bi"pa-ri'e-tal, *a.* Of or pertaining to the two parietal bones.

bip'a-rous, 1 bip'a-rus; 2 bip'a-rŭs, *a.* Producing or bearing two at once. Specif.: (1) *Zool.* Producing two at a birth. (2) *Bot.* (*a*) Bearing two, as a leaf with two leaflets. (*b*) Having two lateral axes, as certain cymes. [< BI- + L. *pario,* bring forth.]

bi-part'i-ble, } 1 bai-pārt'i-bl; 2 bī-pärt'i-bl, *a.* Divisible
bi-part'i-bile, } into two parts. **bi-part'ile†.**

bi-par'ti-ent, 1 bai-pār'ti-ent; 2 bī-pär'ti-ĕnt. **I.** *a.* Serving to divide into two parts; contained twice as a factor. **II.** *n.* That which divides into two equal parts. [< L. *bipartien(t-)s,* ppr. of *bipartio,* divide, < *bis* (see BI-) + *par(t-)e,* share.]

bi-par'tite, 1 bai-pār'tait; 2 bī-pär'tīt (XIII), *a.* **1.** Consisting of or separated into two parts, especially two corresponding parts, as a contract entered into between two parties, each of whom executes and delivers to the other a counterpart; duplicate. **2.** *Bot.* Two-parted almost to the base, as certain leaves. **3.** *Math.* Formed of two corresponding curves which do not meet; containing two distinct sets of variables. **bi-part'ed‡.** — **bipartite curve** (*Math.*), a curve composed of two non-contiguous parts.— **b. number** (*Math.*), in the partition of numbers, a number represented by two integers.

bi"par-ti'tion, 1 bai"par-tish'en; 2 bī"pär-tish'on, *n.* The act or result of division into two parts. [< L. *bipartio;* see BIPARTIENT.]

bi-par'ti-zan, 1 bai-pār'ti-zan; 2 bī-pär'ti-zan, *a.* Formed of or relating to persons representing two parties. **bi-par'ti-san‡.**

bi-pas'chal, 1 bai-pas'kel; 2 bī-păs'cal, *a.* Pertaining to or including two successive passovers: applied to the theory that limits the public ministry of Christ to a period including but two passover seasons.

bi-pec'ti-nate, 1 bai-pek'ti-nēt; 2 bī-pĕc'ti-nāt, *a. Biol.* Having comb-like processes on both sides, as certain antennæ. See ANTENNA. **bi-pec'ti-nat"ed‡.**

bi'ped, 1 bai'ped; 2 bī'pĕd, *a.* **1.** Having two feet. **2.** Having hind limbs only, as some reptiles.

bi'ped, *n.* **1.** An animal having two feet, especially as distinguished from a quadruped.

Human corruption in this sense is as much a fact in the natural history of Man as that he is a *Biped* without feathers.
DUKE OF ARGYLL *Primeval Man* pt. iv, p. 189. [B. & S. 1869.]

2. *Vet.* Any two feet of a quadruped taken together. [< L. *bipes* (*biped-*), two-footed, < *bi-* (see BI-) + *pes,* foot.] — **anterior biped** (*Vet.*), the forelegs of a quadruped, regarded as a pair.— **diagonal b.** (*Vet.*), the diagonally opposite legs of a horse, regarded as a pair.— **lateral b.,** the legs of a horse on either side of the body, regarded as a pair. — **posterior b.,** the hind legs of a horse, regarded as a pair.

bip'e-dal, 1 bip'i-del *or* bai'pi-del; 2 bip'e-dal *or* bī'pe-dal (XIII), *a.* **1.** Of or pertaining to a biped. **2.** Same as BIPED, *a.*, 1.— **bip"e-dal'i-ty,** *n.*

bi-pel'tate, *a.* Having a double shield or shield-like body. — **bi-pen'nate,** *a.* **1.** Two-winged. **2.** *Bot.* Bipinnate. **bi-pen'nat-ed‡.**— **bi-pen'ni-form,** *a.* Having fibers arranged like feather-barbs on both sides of a median tendon: said of muscles.

Mr. Wood . . . has also found this muscle [the first lumbricalis] *bipenniform* in origin, taking rise from the tendons of the index and middle fingers. ALEX. MACALISTER in *Trans. of R. I. A., Muscular Anomalies* third series, p. 94. [G. P. 1875.]

— **bi-pen'nis,** *n. Archeol.* A two-edged battle-ax.

bi-phe'nyl, *n.* Same as DIPHENYL.

Bi'pho-ra, 1 bai'fo-re; 2 bī'fo-ra, *n. pl. Ascid.* A group of tunicates having two kinds of individuals combined in a colonial organism, as the salps. [< BI- + Gr. *pherō,* bear.]

bi"pin-na'ri-a, 1 bai"pi-nē'ri-e; 2 bī"pi-nā'ri-a, *n. Echin.* The bilateral larval stage of various echinoderms, formerly regarded as a genus. The individuals, at this stage, swim freely by the aid of locomotory cilia attached to ring-like cell-groups. [< BI- + L. *pinna,* wing.]

Bipinnate Leaf.

bi-pin'nate, *a. Bot.* Twice or doubly pinnate, as a leaf. **bi-pin'nat-ed‡.— bi-pin'nate-ly,** *adv.*— **bi"pin-nat'i-fid,** *a. Bot.* Twice pinnatifid. **bi"pen-nat'i-fid‡.— bi"pin-nat'i-form,** *a.* Bipinnate in shape.— **bi"pin-nat'i-part-ed,** *a.* Pinnately parted with the divisions also pinnately parted: used when the divisions go down almost as far as the midrib. **bi"pin-nat"i-par'tite‡.— bi"pin-nat'i-sect,** *a.* Pinnatisect with the divisions also pinnatisect: used when the divisions go down to the midrib, and are sessile. **bi"pin-nat'i-sect-ed‡.**

bi-pla'nar, bai-plē'nər; 2 bī-plā'nar, *a.* Formed by or relating to two planes.—**biplanar point of a surface** (*Geom.*), the double point at which the infinity of tangent lines forming a cone degenerates into two intersecting planes.

bi'plane, 1 bai'plēn; 2 bī'plān, **I.** *a.* **1.** Relating to a biplane. **2.** Adjustable in two different planes, as a miter-box. **II.** *n.* **1.** An aeroplane consisting of two superposed main sustaining surfaces; distinguished from *monoplane* and *triplane.* See AVIATION.

Mr. F. H. Wenham, who died so recently as August 11, 1908, was unquestionably the originator of the *biplane* and other superimposed multisurface constructions.
V. LOUGHEED *Vehicles of the Air* p. 149. [B. & B. '09.]

2. *pl.* A pair of coincident planes.—**bi'plane,** *vt.* To navigate the air in a biplane.—**bi'plan-ist,** *n.*

bi'pli-cate, *a.* Twice plated or folded.—**bi-plic'i-ty,** *n.*— **bi-plo'sion,** *n. Phonol.* The action of the breath in pronouncing a stopped consonant or an explodent.—**bi-plo'sive,** *a.*—**bi-po'lar,** *a.* Relating to or possessing two poles. See illus. under GANGLION-CELLS.—**bi"po-lar'i-ty,** *n.*

Bi'pont, 1 bai'pont; 2 bī'pŏnt, *a.* Of or pertaining to Zweibrücken (*Bipontium*) in Bavaria: applied usually to editions of the classics printed there by the ducal press in the latter half of the 18th century. [< BI- + L. *pon(t-)s,* bridge.] **Bi-pon'tine‡.**

bi-po'rose, *a. Bot.* Having or opening by two pores, as certain anthers. **bi-po'rous‡.**

bi'prism, 1 bai'prizm; 2 bī'prĭsm, *n.* **1.** A prism of glass the angle of which is very nearly 180°: used in studying the interference of light-waves. **2.** A cube formed by the union of two short rectangular prisms: used in photometry.—**bi"pris-mat'ic,** *a.*

bi'prong, 1 bai'prōng; 2 bī'prŏng, *n.* A two-pronged fork.

bi-pul'mo-na-ry, *a. Arach.* Having only two pulmonary sacs.— **bi-punc'tal,** *a.* Relating to or determined by two points; as, *bipunctal* coordinates.— **bi-punc'tate,** *a.* Having two punctures.— **bi-pu'pil-late,** *a.* Having two pupils or pupil-like spots, as an ocellus of a butterfly's wing. See LEPIDOPTERA.— **bi-pyr'a-mid,** *n.* A double pyramid; two pyramids base to base or at the ends of a prism, as in some crystals.— **bi"py-ram'i-dal,** *a.*— **bi-quad'ran-tal,** *a.* In trigonometry, having two sides quadrants: said of a spherical triangle. See VERSOR.

bi-quad'rate, 1 bai-kwod'rēt; 2 bī-kwad'rāt, *vt.* [Rare.] To raise to the fourth power. See BIQUADRATE, *n.*

bi-quad'rate, *n. Math.* A fourth power or square of a square. [< BI- + QUADRATE.]

bi"quad-rat'ic, 1 bai"kwod-rat'ik; 2 bī"kwad-răt'ic, *a. Math.* Containing or referring to the square of a square, or fourth power, of a quantity.

Biquadratic is now almost superseded by *quartic,* which corresponds better in form to the adjectives *quintic, sextic,* etc., but it is still used in some phrases, as *biquadratic equation, biquadratic root, biquadratic parabola.*

bi"quad-rat'ic, *n.* **1.** The fourth power of a number. **2.** A biquadratic equation.

bi-quar'ter-ly, 1 bai-kwōr'tər-li; 2 bī-kwar'ter-ly, *a.* **1.** Occurring once in two quarters (six months). **2.** Occurring twice in a quarter.

bi'quartz, 1 bai'kwōrts; 2 bī'kwarts, *n.* **1.** A plate, half of right-handed and half of left-handed quartz, used in experiments concerning the polarization of light. **2.** A plate made up of two oppositely directed quartz wedges that by sliding past each other alter the thickness of the plate.

bi"qua-ter'ni-on, 1 bai-kwa-tūr'ni-ən; 2 bī"kwa-tĕr'ni-on, *n. Math.* **1.** An operator conceived to change one rotor into another as a quaternion changes one vector into another. **2.** A quaternion with imaginary coefficients. [< BI- + QUATERNION.]

bi-quin'tile, *n. Astrol.* The aspects of planets separated by two-fifths of a great circle. [< BI- + QUINTILE.]— **bi-ra'mous,** *a.* Of or having two branches, as a crustacean's limb. **bi-ra'mose‡.**

Bir, 1 bir; 2 bīr, *n.* A fortified town; 80 m. N. E. of Aleppo, Asiatic Turkey. [Ar., well.]

bi-ra'di-al, *a. Biol.* With radii set bilaterally, as in certain sea-anemones.— **bi-ra'di-al-ly,** *adv.*— **bi-ra'di-ate,** *a.* Furnished with two rays. **bi-ra'di-at"ed‡.**

bi-ram'bi, 1 bi-rām'bi; 2 bī-rām'bī, *n.* An East-Indian tree, the bilimbi.

bi-ra'tion-al, 1 bai-rash'en-el; 2 bī-răsh'on-al, *a. Math.* Expressing each of two sets of variables rationally in terms of the other: said of a transformation. [< BI- + RATIONAL.]

Bir-bhum', 1 bir-būm'; 2 bīr-bum', *n.* A district in Bardwan division of Bengal; 1,752 sq. m.; capital, Suri.

birch, 1 bûrch; 2 bîrch, *vt.* To whip with a birch switch; flog.

She *birched* them all round soundly.
KINGSLEY *Water-Babies* p. 187. [MACM.]

birch[1], *n.* **1.** Any tree or shrub of the genus *Betula,* usually with light, thin foliage and the outer bark separable into thin papery layers. The wood is close-grained, generally hard, tough, susceptible of high polish, prized by cabinet-makers, and used for furniture, carriages, spools, shoe-lasts, etc. Of about 35 known species, 10 trees and 4 or 5 shrubs have been described as North-American. Of these the more common or the eastern United States are given below. The **common European** and **Asiatic birch** (*B. alba*) is ornamentally cultivated in many varieties in the northern United States. In Russia its oil is used in dressing Russia leather.

1. Black, cherry, or sweet birch (*Betula lenta*). 2. White birch (*B. populifolia*). 3. Canoe or paper birch (*B. papyrifera*).

The *birch,* most shy and ladylike of trees.
LOWELL *Indian-Summer Reverie* st. 8.

2. [New Zealand.] Any one of the half-dozen species of beech native to New Zealand, as the **black birch** of Auckland and Otago (named from the color of the bark) or the **red birch** of Wellington and Nelson (from the color of the wood), each of which is known as the **tooth-leaved beech** (*Fagus fusca*). **3.** A birch rod; a bunch of twigs for whipping.

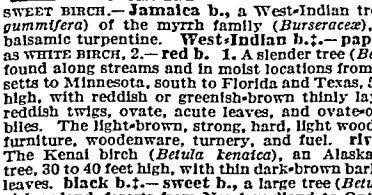
Six weeks' emancipation from the abhorred thraldom of book, *birch,* and pedagogue.
IRVING *Sketch-Book, Stage Coach* p. 232. [G. P. P. 1861.]

4. The wood of the birch. **5.** A birch-bark canoe.

Of all the high distinctive national pleasures of America . . . there is none so intense as shooting rapids in a *birch.*
WINTHROP *Life in the Open Air* ch. 15, p. 117. [O. & CO. 1871.]

[< AS. *beorc.*]

— **alpine** (or **dwarf**) **birch,** a low shrubby species (*B. nana*) of high latitudes in both hemispheres.— **birch'-bark",** *n.* A canoe made from the bark of the white birch.— **b.-camphor,** *n.* Same as BETULIN.— **b.-oil,** *n.* **1.** See OIL and SWEET-BIRCH. **2.** Humorously, a flogging, as with a birch rod.— **b. partridge,** *n.* The ruffed grouse (*Bonasa umbellus*).— **b. wine,** a liquor made from birch-water or -sap.— **birch'-wort",** *n.* A plant of the birch family.— **black b. 1.** See RED BIRCH. **2.** See SWEET BIRCH. **3.** See WESTERN RED BIRCH.— **blue b.,** a forest-tree (*B. cærulea*), widely distributed in eastern Canada and northern New England. It seldom exceeds 30 feet in height, has a thin, whitish bark and ovate leaves. There is a shorter form with leaves smaller and less rounded at the base.— **bronze b.-borer,** an insect (*Agrilus anxius*) infesting the foliage of shade-trees, particularly the birch.— **canoe-b.,** *n.* Same as WHITE BIRCH, 2.— **cherry b.,** same as SWEET BIRCH.— **Jamaica b.,** a West-Indian tree (*Bursera gummifera*) of the myrrh family (*Burseraceæ*), yielding a balsamic turpentine. **West-Indian b.‡.— paper b.,** same as WHITE BIRCH, 2.— **red b. 1.** A slender tree (*Betula nigra*), found along streams and in moist locations from Massachusetts to Minnesota, south to Florida and Texas, 50 to 90 feet high, with reddish or greenish-brown thinly layered bark, reddish twigs, ovate, acute leaves, and ovate-oblong strobiles. The light-brown, strong, hard, light wood is used for furniture, woodenware, turnery, and fuel. **river-b.‡. 2.** The Kenai birch (*Betula kenaica*), an Alaskan seacoast tree, 30 to 40 feet high, with thin dark-brown bark and ovate leaves. **black b.‡.— sweet b.,** a large tree (*Betula lenta*) of rich upland forests from Newfoundland to Ontario southward to Tennessee and northern Florida, with a smooth, close, shining dark-brown bark suggesting two of its common names, **black** and **cherry birch.** The aromatic flavor of the bark on the young twigs gives it its name, and the hard, heavy, strong, dark reddish-brown wood, useful for furniture, gives it still another name, **mahogany birch.** The distilled wood and bark yield birch-oil, nearly the same as oil of wintergreen, for which it is often substituted, and the fermented sap is the common birch beer.— **western red b.,** a shrub or small tree (*Betula fontinalis*) growing along streams from southwestern Canada south to California and Nebraska, and sometimes forming thickets. The bark is dark-bronze and the wood, which is soft, is used for fencing-material. **black b.‡.— white b. 1.** A slender, medium-sized tree (*Betula populifolia*) of gravelly or barren soils from Nova Scotia to northern Delaware westward to the Great Lakes, with chalky-white, smooth bark slowly separating in thin sheets, nearly triangular long-pointed coarsely notched lustrous bright-green poplar-shaped leaves, male catkins usually solitary, and light, soft, weak wood. **gray b.‡. 2.** A much larger tree (*Betula papyrifera*), known as the **paper** or **canoe birch,** from Newfoundland to Pennsylvania westward to the Pacific,



Birch-barks.

Side of upper mandible. 47. Nostril.

bird[1], *n.* **1.** In strict sense, a warm-blooded, feathered, egg-laying vertebrate animal, having the fore limbs modified as wings; an avian sauropsidan as distinguished from a reptilian. Birds have a completely double circulation, and a large breast-bone, usually carinate. All the living forms are without teeth. They have been divided into (1) *Saururæ*, (2) *Odontotolcæ*, (3) *Odontotormæ*, (4) *Rattæ*, and (5) *Carinatæ*. See these words.

The generic use of the word *bird* is recent, *fowl*, now usually specialized, being the original term for feathered animals in general. Compare FOWL.

The *bird* is to him [Shelley] but a winged symbol of divine unrest.
H. H. BOYESEN in *New-York Tribune* July 26, 1892, p. 4, col. 1.

2. A game-bird; in England, specifically, a partridge. **3.** [Archaic.] The young of a fowl; a nestling. **4.** A young girl; maiden. **5.** [Slang.] A peculiar or remarkable person.

The manner in which *bird* is used in early writers leaves little doubt that it was originally 'a thing bred,' connected with A. S. brédan, to breed. SKEAT *Etym. Dict.*

bird of paradise. 1. A paradiseoid corviform bird of New Guinea and adjacent islands, noted for the extraordinary shape and beauty of the plumage of the male; especially, a stout-billed paradiseine.

These birds were formerly fabled never to alight on the earth, but to live in the sun's glare in a supernatural manner — a fancy derived from the fact that the first skins sent to Europe had been deprived of feet. The **great emerald bird of paradise** (*Paradisea apoda*) has a dense erectile tuft of golden-orange plumes about 2 feet long growing from under the shoulder, and elongated wire-like central tail-feathers. The **lesser emerald** (*P. minor*) furnishes most of the paradise-plumes used for ornamenting ladies' head-dresses. The **red** (*P. sanguinea*) and the **king** (*Cincinnurus regius*) are other species. The **twelve-wired** (*Seleucides nigra*) is long-billed or epimachine.

bish'op¹, *n.* **1.** *Eccl.* A spiritual overseer in the Christian Church. (1) In the Roman Catholic, Oriental, Anglican, Protestant Episcopal, and some other churches, a person admitted by episcopal consecration to the highest order of the ministry, with the power to administer ordination and confirmation, and exercising authoritative jurisdiction within his diocese or see, in supervision of the clergy and churches. See ARCHBISHOP; CATHEDRAL; DIOCESE; SEE. (2) In the Methodist Episcopal Church and some others, one who holds a superior office, but does not belong to a distinct order; an official elected, as by the General Conference, for life or for a term of years, to preside over conference, execute the laws of the church, etc.; a superintendent, as in the Lutheran Church. (3) In the Presbyterian, Congregational, and some other churches, any ordained minister who is settled over a parish, and thus has the spiritual oversight of a church. (4) In the Reformed Episcopal Church, an officer to whom is reserved ordination and confirmation, and the general oversight of ministers and churches: differing from the bishops of the Protestant Episcopal Church in being a presiding presbyter, rather than of a separate order, but, like the bishops of that church, claiming to be in historical succession. (5) In the Mormon Church, a judicial and administrative officer elected from the general priesthood. (6) In the English translation of the New Testament, a ruler or overseer in the church: used for the Greek word *episkopos:* applied in one instance to Christ (*1 Pet.* ii, 25), and sometimes used convertibly with *presbyter* or *elder* (*Acts* xx, 17 and 28). In the Roman Catholic Church, the *bishop* holds chief rank in the hierarchy and is always appointed by the Pope and usually nominated by the chapter. Bishops who govern a diocese, or **diocesan bishops**, enjoy ordinary jurisdiction, and are **suffragan bishops** to their metropolitan; **titular bishops, or bishops in partibus** as they were known prior to 1882, have no jurisdiction, but may be appointed **coadjutor bishops**, or assistants to a diocesan bishop, and are sometimes loosely styled **auxiliary bishops; coadjutor bishops cum jure successionis** have the right of succession on the death of the diocesan bishop. In the Church of England, there are three classes of bishops: (1) **diocesan**, nominally elected by the chapter, but practically appointed by the crown; (2) **suffragan**, nominated by the crown; (3) **assistant**, appointed by the prelate. **Coadjutor bishops** may be appointed to all sees. In the Protestant Episcopal Church of the United States, the *bishop* is elected by the diocesan convention, the election being afterward confirmed by at least two-thirds of the remaining bishops and "standing committees." **Coadjutor bishops** have right of succession, and in general convention of 1910 provision was made for **suffragan bishops.** In the United States the *bishop* is subject only to the general law of the church and holds no political status. The Anglican *bishop* takes the oath of allegiance to the sovereign and of canonical obedience to the metropolitan. The archbishops of Canterbury and York and 24 *bishops* in the order of seniority have seats in the House of Peers.

'*Bishop*,' a word as old as the introduction of Christianity into England, though not hiding its descent from 'episcopus,' is thoroughly English. TRENCH *Study of Words* lect. v, p. 164. [W. J. W.]

GEORGE ELIOT *Theophrastus Such* ch. 13, p. 97. [ALL.]

SYN.: blot, blur, brand, crack, daub, defacement, defect, deformity, disfigurement, disgrace, dishonor, fault, flaw, imperfection, injury, reproach, smirch, speck, spot, stain, stigma, taint. Whatever mars the beauty or completeness of an object is a *blemish*, whether original, as squinting eyes, or the result of accident or disease, etc., as the pits of smallpox. A *blemish* is superficial; a *flaw* or *taint* is in structure or substance. In the moral sense, we speak of a *blot* or *stain* upon reputation, a *flaw* or *taint* in character. A *defect* is the want or lack of something; *fault*, primarily a failing, is something that falls of an apparent intent or disappoints a natural expectation; thus a sudden dislocation or displacement of geological strata is called a *fault*. "*Blemish* respects the exterior of an object; *defect* consists in the want of some specific propriety in an object; *fault* conveys the idea not only of something wrong, but also of its relation to the author. . . . An accident may cause a *blemish* in a fine painting; the course of nature may occasion a *defect* in a person's speech; but the carelessness of the workman is evinced by the *faults* in his workmanship." CRABB *English Synonymes*. Figuratively, a *blemish* comes from one's own ill-doing; a *brand* or *stigma* is inflicted by others; as, the *brand* of infamy.

bo'gus, 1 bō'gus; 2 bō'ĝus, *a.* [Slang.] Counterfeit, as money; hence, fraudulent; fictitious; spurious; as, a *bogus* claim; a *bogus* stock company.

Bogus, in the sense of worthless, is undoubtedly ours, but is, I more than suspect, a corruption of the French bagasse (from low Latin bagasea), which travelled up the Mississippi from New Orleans, where it was used for the refuse of the sugar-cane.
LOWELL *Biglow Papers* second series, intro.

[Perhaps related to BOGY[2], BOGLE, BUG.] Syn.: see COUNTERFEIT.

bo'gus[1], *n.* [Slang.] Something sham or worthless, or concerned with worthless things; formerly, an apparatus for counterfeit coining. The word is of American origin, the derivation being variously guessed at. E. D. Howe, in his autobiography (1878), says the name was given to a machine for coining false money, discovered in Painesville, O., in 1827, and adopted by the Painesville *Telegraph* that year; conjectured to be from *tantrabogus*, a New-England word applied to any strange-looking object. The Boston *Courier* (June 12, 1857) derived it from the name of Borghese, an Italian, who about 1837 flooded the southwestern States with fictitious checks and bills. [M.]

bo'gus[2], *n.* [Local, U. S.] A drink made from rum and molasses. [Perhaps < F. *bagasse*, refuse of sugar-cane; or < BOGUS, *a.*]

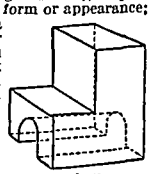
Such boilers are named (1) from their method of construction or arrangement; as, **coil-boiler, drop-flue b., externally fired b., flush-top b.** (locomotive), **hanging-leg b.** (having a hanging water-leg), **multitubular b., oval-flue b., single-flue b., telescope-b.** (having a shell with telescopically arranged sheets), **triple-draft b.**, etc.; (2) from their form or appearance; as, **boot-b.** (fitted over a kitchen grate), **caravan** or **wagon-top b., egg-ended b., elliptical b., haystack b., horizontal b., inclined b., oval b., spherical b., vertical b.**, etc.



Boot-boiler.

3. [Bermuda & W. Ind.] A circular coral reef into which the sea breaks at flood-tide, simulating by the foam and spray a caldron of boiling water. **4.** One who boils. **5.** [Rare.] Food, as meat, suitable for boiling.— **Belleville boiler**, a type of marine boiler in which steam is generated in water-tubes of medium size: used in the British navy and named from the inventor.— **boil'er-brace"**, *n.* A brace between the shell and the flat end of an engine-boiler.— **b.-clamp**, *n.* A clamp used to hold boiler-plates in riveting.— **b.-compound**, *n.* A compound used to remove the crust or scales from the inside of boilers.— **b.-covering**, *n.* *Auto.* A non-conducting covering or cleading fitted to a boiler to prevent loss of its heat by radiation.— **b.-felt**, *n.* A non-conducting wrapping of packed hair, for boilers, hot-water pipes, steam-pipes, etc., to prevent dissipation of heat.— **b.-ferrule**, *n.* *Plumbing.* A screwed bushing for a hole in a kitchen boiler, having a projection to which to solder a lead pipe.— **b.-float**, *n.* A float in a steam-boiler, which actuates a low-water alarm or operates the feeding-device.— **b.-iron**, *n.* Rolled iron sheets such as are used in making steam-boilers, varying in thickness from a quarter to half an inch, and in tensile strength from 40,000 pounds per square inch upward.— **b.-meter**, *n.* A meter for measuring the water used by a steam-boiler.— **b.-plate**, *n.* **1.** Iron plate for making boilers. **2.** One of the separate sheets in a boiler.— **b.-scale**, *n.* A scurf deposited on the metal of steam-boilers in contact with the water.— **b.-shell**, *n.* The body of a cylinder boiler.— **b.-shop**, *n.*— **b.-smith**, *n.* **1.** A man who forges parts of a boiler. **2.** [Rare.] A machine for flanging boiler-plates.— **b.-wagon**, *n.* [Eng.] A freight-car having the middle portion of its platform depressed to receive boilers or large machines.— **breeches b.**, a boiler of the Galloway type, whose two furnace tubes unite into a single flat one beyond the bridge.— **circulating b.**, a boiler in which a current of water is maintained, as by a pump or by difference in temperature.— **compound b. 1.** A boiler having several connected chambers with different functions, as for generating and superheating. **2.** A boiler of two or more connected cylindrical shells.— **Cornish b.**, a horizontal-cylinder boiler having one flue, which contains the grate and the fire, the gases passing first through the flue, then along each side and then under the main portion.— **cylinder b.**, a steam-boiler of cylindrical form: the most common shape for small boilers.— **cylindrical b.** (*Auto.*), a boiler in the form of a plain cylindrical shell, with hemispherical ends. **egg-ended b.‡.— double b.** (*Cookery*), a kitchen utensil comprising two metal vessels that fit the one within the other, and into the larger of which water is placed to cook, by being raised to boiling-

point, the contents of the smaller vessel.— **drop-flue b.**, a steam-boiler having descending flues so arranged that the hot gases from the furnace escape near the point where the feed-water enters.— **elephant b.**, a horizontal cylindrical boiler having three small cylindrical subsidiary shells below the main one.— **flash-b.**, *n.* See under FLASH¹, *n.*— **Galloway b.**, a horizontal-cylinder steam-boiler having two internal flues that converge into one flue.— **Lancashire b.**, a horizontal cylindrical boiler having two horizontal flues containing the fire, the combustion-gases passing through these, returning along the sides, and then passing underneath the shell.— **multiple b.**, a boiler containing a number of tubes, as a tubular boiler.— **multitubular b.**‡.— **Niclausse b.**, a type of marine boiler in which steam is generated in water-tubes of medium size: used in the British navy.— **reversible b.**, a boiler hung on trunnions so that by reversal the scale that accumulates on either side or end may be subjected to the action of the steam in the steam-space.— **Scotch b.**, a short, cylindrical boiler having internal flues leading to a combustion-chamber at the end and return fire-tubes to the uptake in front.— **sectional b.**, a steam-boiler made in sections for convenience in increasing its capacity or in making repairs.— **tubular or multiflue b.**, a boiler in which the gases pass through long tubes, the water to be evaporated being around them: distinguished from a *tubulous boiler*, in which the water is in the tubes.— **water-tube b.**, a boiler in which the steam is generated in tubes between which the products of combustion pass, usually a number of times, before entering the stack.

boil'er-y, 1 beil'ər-i; 2 bŏil'er-y, *n.* [-IES, 1 -iz; 2 -iṣ, *pl.*] **1.** A house or place for boiling, as a salt-pit or sugar-refinery. **2.** *Law.* Water proceeding from a salt-well belonging to one not the owner of the land. **boil'ar-y†.**

boil'ing, 1 beil'iŋ; 2 bŏil'ing, *n.* **1.** The state or process of ebullition. **2.** A thing boiled or to be boiled.— **boil'ing-fur"nace**, *n. Metal.* A water-jacketed reverberatory furnace for decarbonizing iron by a process in which the carbonic oxid escapes with an appearance of boiling.— **b.-point**, *n.* The temperature at which a liquid begins to boil, or to be converted into vapor by bubbles forming within its mass. It varies with the pressure. In water, under ordinary conditions, it is 212° Fahr. or 100° C., but it becomes less with lessened atmospheric pressure, as in ascending a mountain, being lowered about 1° Fahr. for every 550 feet of ascent. The boiling-point of ether is 95° Fahr.; of alcohol, 173°; of mercury, 675°.—**absolute b.-point.** *Physics.* **1.** Same as CRITICAL POINT, 2. **2.** The boiling-point on the absolute scale of temperature; 373° C. above absolute zero.

boil'-o"ver, 1 beil'-ō"vər; 2 bŏil'-ō"ver, *n.* [Colloq., Austral.] An event with a surprizing finish. [milk.

boil'y, 1 beil'i; 2 bŏil'y, *n.* [Dial., Eng.] A gruel of flour and

[1]Medium octavo. [2]Broad quarto. Varies in size up to 10 × 13 inches. † Usually less than 7 × 8½ inches.

Of the terms given above, **quarto, octavo,** and **duodecimo** are often written **4to** or **4°, 8vo** or **8°,** and **12mo** or **12°,** and **octavo** and **duodecimo** are frequently spoken of as **eightvo** and **twelvemo.** The other terms are written as given or with the numeral followed by the suffix **-mo** or the degree-mark, as **36mo** or **36°.**

The measurements stated are by no means absolute, as the nomenclature varies in different countries and with different publishers. There are other designations sometimes used, as **imperial quarto** (15 in. by 11 in.) and **pot quarto** ($7^1/_2$ in. by $6^1/_2$ in.).

For names of materials used to bind books, see list under BOOKBINDING.

book, *n.* **1.** A number of sheets of paper bound or stitched together, whether blank, written, or printed, used for any purpose. Specif.: (1) A printed and bound volume of some bulk, as distinguished from a pamphlet.
In copyright law a *book* is any matter that is expressive of thought or intellectual conceptions clothed in language written, printed, or graven, and may consist of a single sheet, as of music. Its character and purpose are the test, not its size; consequently, the name does not extend to a business label, nor to a *mercantile trade-mark.*
The earliest *book* properly so called, is now generally believed to be the Latin Bible, commonly called the Mazarin Bible (1450 or 1452). HALLAM *Lit. Europe* vol. i, p. 167. [SH. & CO. 1863.]
(2) A volume prepared for written entries or words; as, a note-*book;* cash-*book;* day-*book.* **2.** A literary composition or treatise of some length; as, he is writing a *book* on Egypt; the *books* of the ancients were in the form of scrolls or tablets.
I'll be sworn upon all the *books* in England.
SHAKESPEARE *1 King Henry IV.* act ii, sc. 4.
3. [B-] The Bible; also, any one of the separate tracts or writings of which it is made up. **4.** A subdivision of a literary composition or treatise; as, an epic in twelve *books;* the fourth *book* of Euclid. **5.** Anything considered as a record or a setting forth of truth; as, the *book* of nature.
Finds tongues in trees, *books* in the running brooks,
Sermons in stones and good in everything.
SHAKESPEARE *As You Like It* act ii, sc. 1.
6. The words of a play or opera; a libretto; as, the music of the new opera is good, but the *book* is poor. **7.** *Horse-racing.* A list made by a bookmaker of all the horses entered in a given race, with the odds laid for and against them. **8.** In whist, six tricks taken by one side; in "authors" and similar games, all the cards of one set. **9.** A package of tobacco-leaves with the stems laid the same way. **10.** A bundle of unspun silk in skeins. **11.** A gold-book. See under GOLD. **12.** Any article bound in the shape of a book, as samples of cloth. **13†.** An instrument in writing; a record; register; deed. [< AS. *bōc,* book, (orig.) beech-tree. book'keep"ing, 1 buk'kīp"ıŋ; 2 bo͝ok'kēp"ing, *n.* The art, method, or practise of recording business transactions distinctly and systematically in blank books provided for the purpose, so as to show the goods and moneys received, disposed of, and on hand, the credits given, and the assets, liabilities, and general status of the business, person, or house.
Bookkeeping is practised by either single entry or double entry. In *single entry* the day-book (a day-book and four-

nal kept as one) and the ledger are the essential books; in *double entry*, day-book, journal, and ledger are the essentials, tho a cash-book, bill-book, stock-book, invoice-book, etc., are usually added for accuracy and convenience of reference; but all are finally united in the ledger. In case of litigation the book of *original entries*, whichever that may be, is the one required to be produced in evidence. By the double-entry system every transaction is made to appear on the record as both debtor and creditor by observance of the governing principle that, in every instance, the thing obtained is debtor to the thing given, and the thing given is creditor of the thing obtained, by means of which a correct ledger-balance is always at command.

bot'a-ny, 1 bet'ə-ni; 2 bŏt'a-ny, *n.* [-NIES, 1 -niz; 2 -nis, *pl.*] **1.** The science, or the branch of biology, that treats of plants with reference to their structure, functions, development, analysis, nomenclature, and classification.

The principal branches of botany are:—

BOTANY.
- *Morphology,* which deals with external form.
- *Histology,* with the structure of tissues.
- *Cytology,* with the cell.
- *Embryology,* with the development of the egg-cell.
- *Physiology,* with the functions and vital action of organs.
- *Phytopathology,* with plant diseases.
- *Ecology,* with environmental influences.
- *Phytogeography,* with plant distribution.
- *Taxonomy,* with the classification of plants.
- *Economic Botany,* which includes Agriculture, Forestry, Horticulture, Pharmacognosy, Floriculture, and cognate subjects.
- *Paleobotany,* which treats of fossil plants.

Botanical nomenclature, long a subject of controversy, now follows certain rules adopted by the International Botanical Congress held in Vienna in 1905. Order names now end in *-ales,* family names in *-aceæ,* specific names must be the earliest published, proper adjectives are decapitalized. See NOMENCLATURE.

The Chaldeans, Egyptians, and Greeks were the early cultivators of this science, altho confusing its study with crude speculations as to the relations between animal and vegetable life. Aristotle, who devoted much attention to the subject, divided plants into three classes—trees, shrubs, and herbs. Theophrastus wrote a history of plants describing about 500 species, and Dioscorides and the elder Pliny also wrote upon the subject. Otto Brunfels, a physician of Bern, in his *Herbarium* (Strassburg, 1530-1536) revived the science in Europe: he was followed by such writers as Leonhard Fuchs (*Historia Stirpium,* Basel, 1542), William Turner (*New Herbal,* 1551), and others. Systematic botany was inaugurated by John Ray (*Methodus Plantarum,* 1682), and J. P. de Tournefort (1656-1708), who described 8,000 species. The science was greatly advanced by Linnæus (1707-1778), A. L. de Jussieu (1748-1836), and A. P. de Candolle (1778-1841), since which time the researches of a large number of experts have contributed to a wider knowledge of the various divisions of botany and of its comparative biological relations.

BOTANICAL SIGNS.

① An annual plant.	personal observation, or by the observation of the person to whose name the sign is attached.
② A biennial plant.	? Of doubtful or questionable authority.
♃ A perennial herb.	° or ′ Foot or feet.
△ An evergreen.	′ Inch or inches.
⊙ A monocarpic plant.	″ Line ([1]/[12] inch) or lines. [Sometimes European books give these as ′ feet, ″ inches, ‴ lines.]
♄ A plant having a woody stem.	(Twisting or winding to the right.
♃ An undershrub.	) Twisting or winding to the left.
♅ A shrub.	In describing the *Cruciferæ* the following are sometimes used:
♆ A large shrub.	○= Cotyledons accumbent, and radicle lateral.
♇ A tree.	○‖ Cotyledons incumbent, and radicle dorsal.
♂ or ♂ A staminate (male) plant or flower.	○>> Cotyledons conduplicate, and radicle dorsal.
♀ A pistillate (female) plant or flower.	○‖‖ Cotyledons folded twice (○‖‖‖ if thrice), and radicle dorsal.
☊ A climbing-plant.	× Crossed with, the sign of a hybrid.
☿ A perfect or hermaphroditic flower; or, bearing perfect flowers.	
§ A naturalized plant.	
† An ornamental plant.	
‡ A useful plant.	
♂ or ♂ — ♀ Monœcious.	
♀ ♂ or ♂ : ♀ Dicœcious.	
♂ ☿ ♂ or ♂ ♀ Polygamous.	
∞ Indefinite as to number; numerous.	
0 Wanting as a part; none.

both, 1 bōth; 2 bōth, *a.* The two inclusively or together; the one and the other alike: referring to two, and not merely to one of them; as, *both* boys; *both* his hands.

There is always hope when people are forced to listen to *both* sides. MILL *On Liberty* ch. 2, p. 88. [J. B. A. 1885.]

[ME. *bathe*, < Icc. *bāthir*; cp. AS. *bā*, both.] **bothe†.**

Syn.: twain, two. *Both* refers to *two* objects previously mentioned, or had in mind, viewed or acting in connection; as, *both* men fired at once; "*two* men fired" might mean any two, out of any number, and without reference to any previous thought or mention. *Twain* is a nearly obsolete form of *two*. *The two*, or *the twain*, is practically equivalent to *both*; *both*, however, expresses a closer unity. We would say *both* men rushed against the enemy; the *two* men flew at each other. When *both* is used in a negative sentence, the meaning intended is sometimes doubtful. "*Both* applicants were not accepted." Were both applicants rejected? or was one rejected and the other accepted? or was neither applicant accepted or rejected? A similar confusion of sense occurs in some negative sentences containing *all*, when *not* is misplaced. It is a peculiarity of *both* that it can not be negatived by connecting *not* immediately with it, except elliptically in sentences of unusual form that are obviously arranged for the prevention of misunderstanding — as in correcting the doubtful meaning of the sentence cited above. "*Both* applicants were not accepted." If one asks, in order to make matters clear, "Were *both* applicants rejected?" the reply may properly be, "*Not both* were rejected; one was rejected and one accepted"— a connection of *not* with *both* that is usually inadmissible. The confusion in meaning of a negative sentence containing *both* will be best avoided by making the sentence affirmative; "*Both* applicants were rejected." "One of the two applicants was rejected and the other accepted," etc. The sentence "*Both* men are *alike*" suggests that (possibly) one of the two might be alike and the other unlike — a suggestion produced by the intrusive emphasis of *two* implied in *both*. *Both* may be correctly used with *like*, but not with *alike*. "*Both* sons, in looks and character, are *like* their father," but not "*both alike*" (that is "*like* each other"). Compare EVERY.— Ant.: each, either, every, neither, none, no one, not any.— **both'-hand"ed,** *a.* Using both hands; ambidextrous.— **b.-handedness,** *n.*— **b.-handst,** *n.* A handy person; factotum.— **b.-sided,** *a.* Considering or derived from both sides; comprehensive; impartial; as, *both-sided* argument.— **b.-sidedness,** *n.*— **b.-sidest,** *a.* Two-faced; double-dealing; deceitful.— **b. the two,** the two inclusively; both.

both, *pron.* The two, including the one and the other; the pair; these two; as, *both* were now happy.

Both would their little ends secure. PRIOR *Alma* can. 2, st. 6.

both, *adv.* & *conj.* Equally; alike; as well; not only: used before two or more coordinate words or phrases taken or considered inclusively, connected by *and* expressed or understood, and implying unity of action, character, position, treatment, or the like.

All they which dwelt in Asia heard the word of the Lord Jesus, *both* Jews and Greeks. *Acts* xix, 10.

"And," following *both*, is often equivalent to "but" or "as," so that *both* . . . *and* may signify "*not only* (this one) *but* (the other)," or "*as well* (this thing) *as* (that)," expressing emphatic coordination.

As an adjective or pronoun *both* emphasizes the idea of *two*. It has been well defined as "the two, and not merely one of them"; it can not properly, therefore, be connected with or refer to more than two objects. As a conjunction, however, *both* has a more extended meaning and employment than it has as an adjective or a pronoun; thus, it is permissible to say, "He lost all his live stock — *both* horses, cows, and sheep." *Both*, as so used, emphasizes the extent or comprehensiveness of the assertion. The use antedates Chaucer.

Both, 1 bōt; 2 bōt, **Andreas** [1609?–1644?], and **Jan** (1610?–after 1662). Dutch painters; brothers; Jan painted landscapes, Andreas filled in the figures.

Syn.: barrier, border, bound, bourn, bourne, confines, edge, enclosure, frontier, landmark, limit, line, marches, marge, margin, term, termination, verge. The *boundary* was originally the *landmark,* that which marked off one piece of territory from another. The *bound* is the *limit,* marked or unmarked. Now, however, the difference between the two words has come to be simply one of usage. As regards territory, we speak of the *boundaries* of a nation or of an estate; the *bounds* of a college, a ball-ground, etc. *Bounds* may be used for all within the *limits, boundary* for the limiting line only. *Boundary* looks to that which is without; *bound* only to that which is within. Hence we speak of the *bounds,* not the *boundaries,* of a subject, of the universe, etc.; as, the students were forbidden to go beyond the *bounds.* A *barrier* is something that bars ingress or egress. A *barrier* may be a *boundary,* as was the Great Wall of China. *Bourn,* or *bourne,* is a poetical expression for *bound* or *boundary.* A *border* is a strip of land along the *boundary. Edge* is a sharp terminal line, as where river or ocean meets the land. *Limit* is now used almost wholly in the figurative sense; as, the *limit* of discussion, of time, of jurisdiction. *Line* is a military term; as, within the *lines* or through the *lines,* of an army. See BARRIER; END; MARGIN.— Ant.: center, citadel, estate, inside, interior, land, region, territory.— Prep.: the boundaries *of* an estate; the boundary *between* neighboring territories.

Brahm, 1 brām; 2 brām, *n.* [If *Brahm* is masculine, the nominative singular is *Brahmā*; if neuter, *Brahma*.] [Sans.] The absolute divine primordial essence; the supreme Soul of the Universe, self-existent, absolute, and eternal, from which all things emanate, and to which all return. *Brahm*, as the pervading spirit of the universe and divested of all quality and action, is an object of meditation, and the ultimate absorption in *Brahm* is the fundamental principle of Brahmanism. When dominated by activity *Brahm* constitutes the Hindu Tri-murti, and is further manifested in Brahmā.

This supreme soul (*Brahm*) receives no worship. . . . It forms, however, the essence of Brahman, the creator and ruler of the world, or the phenomenal God, and in this sense even Brahman (neuter) is sometimes spoken of as the active Creator.
J. Dowson *Classical Dict. Hindu Myth.* i. 1. [TR. & CO. 1879.]

[< Sans. *brahmā*, worship.] **Brah'ma**‡; **Brah'man**‡; **Bra'ma**‡.

Brāh'ma-na, 1 brā'ma-na; 2 brä'ma-na, *n.* [Sans.] One of three main divisions of the Veda.

The Mantra portion consists of prayer and praise, mainly in metric hymns. See MANTRA. The Brāhmana portion is a collection of ritualistic precepts, mainly in prose. The Upanishads contain mystical or secret doctrines. All three are *Śruti*, or revelation. The *Brāhmanas* are intended, as their name implies, for the Brahmans, especially while conducting the complicated sacrificial ceremonies. Each of the Sanhitās has its own Brāhmana. To the Sanhitā portion of the Rig-Veda belong the Aitareya-*B.* and the Kaushitaki-*B.* (or Śankhāyana-*B.*). To the Sanhitā portion of the Yajur-Veda belong the Taittiriya-*B.* and the Satapatha-*B.* To the Sāma-Veda Sanhitā belong eight *B.*, the most important of which is the Tāndya or Praudh or Panchavinśa, to which is added the Shadvinśa. To the Atharva-Veda belongs the Gopatha-*B.* Dr. Haug would place the origin of the bulk of the Brāhmanas between 1400 and 1200 B. C.; Max Müller, between 800 and 600 B. C.

Brah"man-ba'ri-a, 1 brā"man-bā'ri-ə; 2 brä"man-bä'ri-a, *n.* A town in Tiperah district, province of Eastern Bengal and Assam, India.

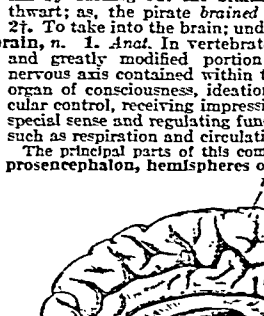
brain, *n.* **1.** *Anat.* In vertebrate animals the enlarged and greatly modified portion of the cerebrospinal nervous axis contained within the cranium. It is the organ of consciousness, ideation, and voluntary muscular control, receiving impressions from the organs of special sense and regulating functions necessary to life, such as respiration and circulation.

The principal parts of this complex organ are: (1) the **prosencephalon, hemispheres or cerebrum**, by far the



Median Section of Human Brain.

a, a, cerebrum; *b*, cerebellum; *c*, medulla oblongata; *d*, pons; *e*, pituitary body; *f*, cuneus; *g*, precuneus; *h*, corpus callosum; *i*, septum lucidum; *k*, foramen of Monro; *l*, optic nerve; *m*, fourth ventricle; *n*, paracentral lobule.

largest portion in higher vertebrates, consisting of two semi-ovoid masses separated by a deep fissure (*great longitudinal fissure*) and united by a broad commissure, the *corpus callosum*; (2) the **diencephalon** or **interbrain**, comprising two large masses of gray matter, the *optic thalami*, and the parts contiguous thereto; (3) the **mesencephalon** or **midbrain**, comprising the *crura cerebri* and the *corpora quadrigemina*; (4) the **metencephalon**, comprising the *cerebellum* and the *pons Varolii*; and (5) the **myelencephalon** or *medulla oblongata*. To these may be added the **rhinen-**

cephalon or nose-brain, a comparatively large portion in many vertebrates, reduced in man to the inconspicuous *olfactory bulb.*

The average weight of the human brain is about 50 ounces avoirdupois for males and 44 ounces for females, being 2.16 per cent. of the weight of the body in males and 2.24 per cent. in females, surpassing, in this respect, that of all other animals, altho the gross weight of the brain in some bulky animals (whales, elephants) is greater than in man.

The essential active elements in the brain are the nerve-cells, which constitute the bulk of the gray matter, forming a layer on the exterior of the cerebrum and cerebellum and various ganglionic masses elsewhere. For the cavities of the interior of the brain, see under VENTRICLE.

In the *brain* of a great scholar, the furrows are very deep and crooked and hundreds of creases appear which are not found at all in the *brains* of ordinary men.

FISKE *Destiny of Man* ch. 5, p. 49. [ɪ. ᴍ. & co. 1890.]

2. The intelligence or mental power of which the brain is held to be the seat; mind; intellect; often in the plural; as, the man is absolutely without *brains.*

Opie's receipt for his painting is universally good — mix the colors with *brains.*

brom'grас", 1 brəm'gras"; 2 brŏm'grăs", *n.* [S.-Afr. D.]

brom-hy'drate, 1 brōm-hai'drēt; 2 brōm-hȳ'drāt, *n.* Same as HYDROBROMATE.— **brom-hy'dric,** *a.* Same as HYDROBROMIC.

brom-hy'drin, 1 brōm-hai'drin; 2 brōm-hȳ'drin, *n. Chem.* A compound like *chlorhydrin*, in which bromin is substituted for chlorin. Compare CHLORHYDRIN.

bro'mi-as, 1 brō'mi-əs; 2 brō'mi-as, *n.* [BRO-MI'A-DES, 1 bro-mai'ə-diz; 2 bro-mī'a-dēz, *pl.*] [Gr.] *Archeol.* A cup resembling the scyphus, but larger.

bro'mic, 1 brō'mik; 2 brō'mic (XIII), *a. Chem.* Of, pertaining to, or containing bromin, especially in its higher valence.— **bromic acid,** a liquid compound ($HBrO_3$) formed by treating bromin water with chlorin.— **b. silver** (*Mineral.*), same as BROMYRITE.

bro'mid, } 1 brō'mid, -mid *or* -maid; 2 brō'mid, -mid *or*
bro'mide[1], } -mīd (XIII), *n.* **1.** *Chem.* A compound of bromin with an element or an organic radical; a salt of hydrobromic acid; as, potassium *bromid*. The bromids are of considerable importance *in the arts as well as in* medicine. **2.** A photograph printed on paper, porcelain, etc., that has been subjected to the effects of bromid of silver.— **acid bromid** (*Chem.*), a compound produced by the union of bromin with an acid radical such as acetyl.— **b. emulsion,** a silver-nitrate solution, containing also potassium iodid and bromid.— **b. paper** (*Phot.*), a paper which has been subjected to a coat of gelatin saturated with silver bromid: used in contact printing.— **silver b.,** a sensitive salt of silver used in photographic emulsions, for plates and developing papers.

bro'mide[2], 1 brō'maid; 2 brō'mid, *n.* [Slang, U. S.] One who utters platitudes; a commonplace bore.— **bro-mid'ic,** *a.* [Recent.] *Commonplace; inevitable; obvious; sedative.*

bro'mid-i'on, 1 brō'mid-ai'ən; 2 brō'mid-ī'ŏn, *n. Chem.* Ionic bromin. See ION. [< BROMID + ION.]

bro"mi-dro'sis, 1 brō"mi-drō'sis; 2 brō"mi-drō'sis, *n. Pathol.* A disorder of the sweat-glands, attended by fetid perspiration. [< Gr. *brōmos*, stench, + *hidrōs*, sweat.]

bro'min, } 1 brō'min, -min *or* -min; 2 brō'min, -min *or*
bro'mine, } -min (XIII), *n. Chem.* A dark reddish-brown, non-metallic liquid element with a suffocating odor; one of the halogens. It is never found free in nature, but in compounds it occurs in spring waters, salt deposits, certain silver ores, and to a small extent in sea-water. Commercially it is prepared from bittern. It forms a brownish vapor which is extremely irritating to the eyes and mucous membranes. When dropped on the skin it forms sores which heal with difficulty and it is very poisonous when swallowed. Its most important antidotes are magnesia, white of egg, and starch-water. Chemically the element acts like chlorin and unites directly with the elements to form bromids. It is used in synthetic chemistry, medicine, and the color industry. See ELEMENT. [< F. *brome*, < Gr. *brōmos*, stench.] **brome‡.**

bro'mi-nate, 1 brō'mi-nēt; 2 brō'mi-nāt, *vt.* Same as BROMATE.— **bro"mi-na'tion,** *n.*

Bro'mi-os, 1 brō'mi-os; 2 brō'mi-ŏs, *n.* Same as DIONYSOS.

Bro'mi-us‡.— **Bro'mi-an,** *a.* & *n.*— **Bromian drink,** wine.

bro'mi-pin, 1 brō'mi-pin; 2 brō'mi-pĭn, *n. Chem.* A yellow oily liquid prepared in concentrations of 10 and 33⅓ per cent. brominized sesame-oil and administered in epilepsy. [< BROMIN.]

bro'mism, 1 brō'mizm; 2 brō'mizm, *n. Pathol.* Poisoning from excessive use of bromin or bromids. Its chief symptoms are an eruption of the skin accompanied by decrease in muscular power and mental activity. **bro'min-ism‡.**

bro'mite, 1 brō'mait; 2 brō'mit, *n. Mineral.* Same as BROMYRITE.

bro'mize, 1 brō'maiz; 2 brō'mīz, *vt.* [-MIZED; -MIZ-ING.] To combine, impregnate, or treat chemically with bromin or a bromid; as, to *bromize* collodion in photography. **bro'mise‡.**— **bro"mi-za'** [or -sa']**tion,** *n.*

Brom'ley, 1 brum'li; 2 brŏm'ly, *n.* **1. Sir Thomas** (1530-4/12 1587), an English Lord Chancellor; presided at the trial of Mary Queen of Scots. **2.** A market-town in Kent, England.

brom'lite, 1 brəm'lait; 2 brŏm'lit, *n. Mineral.* A barium-calcium carbonate, (Ba,Ca)CO_3, white to gray and pink, having a vitreous luster, and crystallizing in the orthorhombic system. [< *Bromley* Hill, England.] **al'ston-ite‡.**

brom'ming, 1 brəm'iŋ; 2 brŏm'ing, *a.* Designating a sound made by the brom-vogel. [Imitative.]

bro"mo-ac'e-tate‡.— **bro"mo-a-ce'tic,** *a.* Of or pertaining to bromin and acetic acid; as, *bromo-acetic acid*, a crystalline compound ($CH_2Br.CO_2H$) formed by the bromination of acetic acid.— **bro"mo-ben'zene,** *n. Org. Chem.* A bromin substitution product of benzene, obtained by straight bromination or other process; specif., a colorless oily liquid (C_6H_5Br).— **bro"mo-bo'rate,** *n. Chem.* A double hydrobromic and boric-acid salt.— **bro'mo-form,** *n. Chem.* An oily liquid compound ($CHBr_3$) resembling chloroform, obtained by the action of bromin on alcohol in the presence of an alkali.— **bro'mo-for"min,** *n.* Same as BROMALIN. — **bro"mo-gel'a-tin,** *a.* Pertaining to or made from a mixture of bromid, silver nitrate, and gelatin, as a photographic emulsion. **bro"mo-gel'a-tine‡.**

bro-mog'ra-phy, 1 bro-meg'rə-fi; 2 bro-mŏg'ra-fy, *n.* Same as BROMATOGRAPHY.

bro"mo-i'o-dism, 1 brō"mo-ai'o-dizm; 2 brō"mo-ī'o-dism, *n. Pathol.* Poisoning resulting from excessive use of bromin and iodin or their compounds.— **bro"mo-i'o-dized,** *a.* Treated or charged with iodids and bromids.

bro'mol, 1 brō'mōl *or* -mel; 2 brō'mōl *or* -mŏl, *n. Chem.* Tribromphenol as an antiseptic and disinfectant. [< BROM- + *-ol* in TRIBROMPHENOL.]

bro"mo-ma'ni-a, *n. Pathol.* Mania resulting from the excessive use of bromin.— **bro"mo-pi'crin,** *n. Chem.* A colorless pungent explosive liquid (CNO_2Br_3) corresponding to and resembling chloropicrin.

Bromp'ton, 1 bremp'tən; 2 brŏmp'ton, *n.* A district in S. W. London, England.

Broms'grove, 1 bremz'grōv; 2 brŏmz'grōv, *n.* A market-town in Worcestershire, England.

Bro'mus, 1 brō'mus; 2 brō'mŭs, *n. Bot.* A large genus of grasses — the brome-grasses — having the rather large spikelets, usually awned, in lax panicles. *B. secalinus* is the chess or cheat. [< Gr. *bromos*, kind of oats.]

brom'-yo"gel, 1 brem'-i-ō"gel: 2 brŏm'-ī-ō"ĕl, *n.* [S.-Afr. D.] The ground-hornbill (*Bucoraz cafer*). [< D. *brom-men*, to buzz, + *vogel*, bird.]

Brom'wich, 1 brem'ich; 2 brŏm'ich, *n.* See WEST BROMWICH.

bro'my-rite, 1 brō'mi-rait; 2 brō'my-rit, *n. Mineral.* A transparent to translucent silver bromid (AgBr) with a resinous to adamantine luster, varying from bright yellow to olive-green, and crystallizing in the isometric system. [< BROMIN + ARGYRITE.] [source; well.

bron, 1 bren; 2 brŏn, *n.* [S.-Afr. D.] A spring; water-

bron-chad"e-ni'tis, 1 breŋ-kad"i-nai'tis *or* -ni'tis; 2 brŏŋ-cād'e-nī'tis *or* -nī'tis, *n. Pathol.* Inflammation of the bronchial glands. [< BRONCHO- + ADENITIS.]

bron'chi, 1 breŋ'kai; 2 brŏŋ'cī, *n.* Plural of BRONCHUS.

bron'chi-, } 1 breŋ'ki-, -ki-o-; 2 brŏŋ'ci-, -ci-o-. See
bron'chi-o-, } BRONCHO-: combining forms.

> Words beginning with this prefix will be found in alphabetical place, either singly or in groups.

bron'chi-a, 1 breŋ'ki-ə; 2 brŏŋ'ci-a, *n. pl. Anat.* The larger air-passages of the lungs, subdivisions of the bronchi. [LL., < Gr. *bronchia*; see BRONCHITIS.]

bron'chi-al, 1 breŋ'ki-əl; 2 brŏŋ'ci-al, *a.* Of, pertaining to, or composing the bronchia or bronchi of the lungs; as, the *bronchial* cells; *bronchial* membrane. **bron'chi‡.** — **bronchial arteries,** arteries that accompany the bronchial tubes and supply the substance of the lungs.— **b. tubes,** bronchi and their subdivisions.— **bron'chi-al-ly,** *adv.*

bron"chi-arc'ti-a, *n. Pathol.* Stenosis or narrowing of the bronchial passages.— **bron"chi-des'mus,** *n. Ornith.* A membrane uniting the bronchi.— **bron"chi-ec'ta-sis,** *n. Pathol.* Morbid dilatation of the bronchial tubes.— **bron"chi-ec-tas'ic,** *a.*— **bron"chi-o-gen'ic,** *a.* Originating in the bronchial tubes or region.— **bron'chi-ole,** *n. Anat.* One terminal division of the bronchial tubes, about 1 mm. or less in diameter. **bron"chi-o'lus‡.**— **bron"chi-o-lec'ta-sis,** *n. Pathol.* Dilatation of the bronchioles.— **bron"chi-o-li'tis,** *n. Pathol.* Inflammation of the bronchioles; capillary bronchitis.— **bron'chi-o-spasm,** *n. Pathol.* A spasmodic contraction of the bronchia.— **bron"chi-o-ste-no'sis,** *n. Pathol.* Contraction of a bronchus or *bronchial tube.* **bron"cho-ste-no'sis‡.**— **bron-chil'mus,** *n. Pathol.* Spasmodic contraction of the bronchia.

bron-chi'tis, 1 breŋ-kai'tis *or* -ki'tis; 2 brŏŋ-ci'tis *or* -ci'tis, *n. Pathol.* Inflammation of the bronchial tubes, or, loosely, of the bronchi or trachea. [< Gr. *bronchia*, bronchial tubes, < *bronchos*, windpipe.]— **verminous bronchitis** (*Vet.*), bronchial inflammation in cattle caused by a parasitic worm, *Strongylus filaria*, finding lodgment in the tubes: called *husk* when occurring in sheep, and *hoose* in calves.— **bron-chit'ic,** *a.*

bron'cho, *n.* Same as BRONCO.

bron'cho-, 1 breŋ'ko-; 2 brŏŋ'co-. From Greek *bronchos*,

windpipe: a combining form.— **bron"cho-car-cin'i-a**, *n. Pathol.* Cancerous disease of the windpipe and its branches.— **bron"cho-cav'er-nous**, *a. Pathol.* Designating the sound heard in auscultation over a pulmonary cavity into which a bronchus opens.— **bron'cho-cele**, *n. Pathol.* Morbid enlargement of the thyroid gland: goiter.— **bron"cho-hem"or-rha'gi-a**, *n. Pathol.* Bronchial hemorrhage. **bron"chor-rha'gi-at.**— **bron'cho-lith**, *n. Pathol.* A calculus formed in or near a bronchus.— **bron"cho-my-co'sis**, *n. Pathol.* Any affection of the bronchi resulting from fungi.— **bron-chop'a-thy**, *n. Pathol.* Any morbid affection of the bronchi or their subdivisions.— **bron-chŏph'o-ny**, *n. Med.* The strong resonant sound of the voice as heard in auscultation of the larger bronchial tubes; also, that heard on occurrence of hepatization of the lungs. **bron-chŏph'o-nism†.**— **bron"cho-phon'ic**, *a.*— **bron'cho-plas"ty**, *n. Pathol.* Operation to close a tracheal fistula.— **bron"cho-ple'gi-a**, *n. Pathol.* Bronchial paralysis.— **bron"cho-pneu-mo'ni-a**, *n. Pathol.* Bronchitis complicated with inflammation of the surrounding substance of the lungs; catarrhal pneumonia. **bron"cho-pneu"mo-ni'tis†.**— **bron"cho-pul'mo-na-ry**, *a. Anat.* Pertaining to the lungs and bronchi.— **bron"chor-rha'gi-a**, *n.* Bronchohemorrhagia.— **bron"chor-rhe'a**, *n. Pathol.* Chronic inflammation of the bronchial tubes, with increased secretion and expectoration of mucous matter: bronchial catarrh. **bron"chor-rhœ'at.**— **bron'cho-scope**, *n.* An instrument for inspecting the interior of the bronchi by means of electric light.— **bron-chos'co-py**, *n.* Inspection of the bronchi by the bronchoscope.— **bron'cho-tome**, *n. Surg.* An instrument for cutting into the windpipe.— **bron-chot'o-my**, *n. Surg.* The operation of making an incision into the windpipe; tracheotomy.— **bron-chot'o-mist**, *n.*— **bron"cho-tra'che-al**, *a.* Situated in the bronchi and trachea, as the syrinx of oligomyodian birds.— **bron"cho-ve-sic'u-lar**, *a. Med.* Pertaining to both the air-passages and the air-cells of the lungs: said of a murmur heard on auscultation.

bron'chus, 1 breŋ'kus; 2 brŏŋ'cŭs, *n.* [-CHI, 1 -kai; 2 -cī, *pl.*] *Anat.* 1. Either of the two subdivisions of the trachea conveying air into the lungs. See illus. under PLEURA. 2. Erroneously, one of the bronchia. [< Gr. *bronchos*, windpipe.]

bron'co, 1 breŋ'ko; 2 brŏŋ'co, *n.* [-COS, 1 -koz, 2 -cōs, *pl.*] [W. U. S.] A nearly unbroken native horse, usually an Indian pony or one bred from Indian stock; a mustang. Its origin has been traced to New Mexico and California. Broncos are valued for their hardy constitution, tho their habits remain vicious even in the tamed state.

Small, active horses, called *broncos*, said to be from a Spanish word, signifying that they can never be broke.
ISABELLA L. BIRD *Life in Rocky Mountains* p.36. [G.P.P. 1885.]

[< Sp. *bronco*, rough.] **bron'cho†.— bron'co-bust"er**, *n.* [Slang, W. U. S.] One who breaks a bronco to the saddle.— **b.-busting**, *n.* [Slang, W. U. S.] The employment or process of taming broncos to submit to the saddle.

brondt, *n.* Brand; firebrand; sword.

Brönd'sted, 1 brün'sted; 2 brün'stĕd, **Peter Oluf** (11/17 1780–6/28 1842). A Danish archeologist and explorer; *Travels and Researches in Greece.*

bron'gie, 1 bron'ji; 2 brŏn'gi, *n.* [Shetland.] The cormorant.

bron-gniar'dite, 1 breŋ-yär'dait; 2 brŏŋ-yär'dĭt, *n. Mineral.* A grayish-black lead-silver sulfantimonite ($PbAg_2Sb_2S_5$) with a metallic luster, crystallizing in the isometric system. [< A. *Brongniart*, French mineralogist.]

Bron"gniart', 1 brŏŋ'nyär'; 2 brŏŋ'nyär', *n.* **1. Adolphe Théodore** (3/11 1801–2/13 1876), a French botanist. **2. Alexandre** (2/3 1770–8/7 1847), a French chemist and mineralogist.

Bron'son, 1 breŋ'sən; 2 brŏŋ'son, *n.* A village in Branch county, Mich.

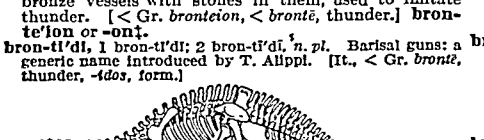
Bron'te, 1 breŋ'tē; 2 brŏŋ'te, *n.* A town in Sicily.

Bron'të, *n.* **1. Anne** (3/23 1820–5/28 1849), an English novelist; sister of Charlotte; pseudonym, "Acton Bell"; *Tenant of Wildfell Hall*, etc. **2. Charlotte** (4/21 1816–3/31 1855), an English novelist; pseudonym, "Currer Bell"; *Jane Eyre*, etc. **3. Emily Jane** (6/30 1818–12/19 1848), an English novelist; sister of preceding; pseudonym, "Ellis Bell"; *Wuthering Heights.*

Bron-te'i-dæ, 1 bron-tī'i-dī; 2 brŏn-tē'i-dē, *n. pl. Crust.* A family of trilobites. **Bron'te-us**, *n.* (t. g.) [< Gr. *Brontës*, one of the Cyclopes, < *brontē*, thunder.]— **bron'te-id**, *n.* — **bron'te-oid**, *a.*

bron-te'um, 1 bron-tī'um; 2 brŏn-tē'ŭm, *n.* [-TE'A, *pl.*] In the ancient theater, a device consisting of bronze vessels with stones in them, used to imitate thunder. [< Gr. *bronteion*, < *brontē*, thunder.] **bron-te'ion** or **-on†.**

bron-ti'di, 1 bron-tī'dī; 2 bron-tī'dī, *n. pl.* Barisal guns: a generic name introduced by T. Alippi. [It., < Gr. *brontē*, thunder, *-idos*, form.]



Reconstruction of the Brontosaurus. 1/250

Length, 66 ft. 8 in.; height, as mounted, 15 ft. 2 in.; weight of petrified thigh-bone, 570 pounds; estimated weight of animal when alive, 70,000 pounds. (American Museum of Nat. Hist., New York.)

bron'to-, 1 bron'to-; 2 brŏn'to-. From Greek *brontē*, thunder, or *Brontës* (Thunderer), one of the Cyclopes: a combining form, in paleontology usually denoting hugeness.— **bron'to-gram**, *n.* The record-sheet of a brontograph; also, any diagrammatic representation, by lines, of thunder-storm phenomena.— **bron'to-graph**, *n.* **1.** An instrument that records the occurrence of thunder. **2.** A chart showing the tracings made by such an instrument.— **bron'to-lith**, *n.* A meteoric stone; a thunder-stone. **bron'to-lite†.— bron-tol'o-gy**, *n.* A treatise on thunder.— **bron-tom'e-ter**, *n.* An instrument for the observation of thunder; properly, a brontograph.— **bron"to-sau'rus**, *n.* A huge atlantosauroid dinosaurian reptile (genus *Brontosaurus*) found fossil in western North America.

The *Brontosaurus* belongs to the Upper Jurassic Period, was probably a vegetarian and aquatic in habits, wading in shallow or moderately deep water. Besides the mounted skeleton in the American Museum there are skeletons in the Field Museum, Chicago (mounted), the Peabody Museum of Yale University (partly mounted), and the Carnegie Museum, Pittsburg (unmounted). Less perfect specimens are to be found in various museums in this country and Europe.
W. D. MATTHEW *Letter to Standard Dict.* Sept. 1, '10.

— Bron"to-the-ri'i-dæ, *n. pl. Mam.* The *Menodontidæ* or *Titanotheriidæ*.— **bron"to-the'ri-id**, *n.*— **bron"to-the'ri-oid**, *a.* & *n.*— **bron"to-the'ri-um**, *n. Mam.* **1.** A fossil (Tertiary) rhinoceros-like ungulate of the genus *Menodus*, of elephantine size, found in western North America. It has a transverse pair of large bony prominences, probably horn-cores, in the nasal region. **bron'to-there†. 2.** [B-] A genus typical of *Brontotheriidæ*. **— bron"to-zo'um**, *n.* A gigantic Triassic reptile or bird (genus *Brontozoum*), whose footprints occur in the Connecticut Valley.

The Brontotherium (*B. gigas*).

Bronx, 1 breŋks; 2 brŏŋks, *n.* **1.** A river in S. E. New York, flowing through Bronx county to East River. **2.** A county of S. E. New York; 41 sq. m.; borough of New York city.

bronze, } 1 brenz; 2 brŏnz. [BRONZED, BRONZD[8]; BRONZ-
bronz[2], } ING.] *v. I. t.* **1.** To give the color or appearance of bronze to by a mechanical or chemical process; as, the cast was *bronzed*. **2.** To give a similar color to by natural means, as by exposure to the sun; brown; tan; as, a *bronzed* Arab.

Leaves of blackberry briers are *bronzed* and besprinkled with copper. BAYARD TAYLOR *August* st. 11.

3. To harden like bronze; make unfeeling or brazen; as, his brow was *bronzed* with assurance.

II. *i.* To become like bronze, as in color; be sunburned.— **bronzed skin-disease** (*Pathol.*), Addison's disease.— **bronz'er**, *n.* One who or that which bronzes; specif., a bronzing-machine, or brush for applying bronze-powder.

bronze, *n.* **1.** A reddish-brown alloy of copper and tin, sometimes containing small proportions of other metals. Bronze, which was known at a very early period, is an important material used for making weapons, coins, domestic utensils, bells, cannon, and statuary, and for many other purposes. Several varieties of bronze derive their names from a constituent alloy; as, **bismuth-bronze, carbon-b., cobalt-b., manganese-b., nickel-b., phosphorus-b., silicon-b.**, etc.

2. An artistic production in bronze, as a statue or statuette. **3.** One of various metallic powders or pigments more or less resembling bronze, used in decorative work; as, gold *bronze*, silver *bronze*, blue *bronze*. **4.** The color of bronze. **5.** Impudence; effrontery; brass. [F., < It. *bronzo*, brass, < *bruno*, brown, < OHG. *brûn*, brown.]

The following table shows the composition of different kinds of bronze in parts by weight:

— bronze age, see AGE.— **bronze'-back"er**, *n.* [U. S.] The black bass.— **b.-gold**, *n.* Any bronze resembling gold in color.— **b.-liquid**, *n.* Varnish mixed with bronze-powder.— **b.-liquor**, *n.* A solution of antimony trichlorid and copper sulfate, used in bronzing metals, as gun-barrels.— **b.-paint**, *n.* Gold paint; bronze-liquid.— **b.-powder**, *n.* See BRONZE, 3.— **bronze'wing"**, *n.* Any Australian phapine pigeon with bronze coloration.— **chemical b.**, a solution of platinum chlorid, used as a bronzing-liquid.— **bronz'en**, *a.* [Rare.] Made of or like bronze.— **bronz'i-fy**, *vt.* To make into bronze; represent or cast in bronze.— **bronz'in(es).** *I. a.* Having the color of bronze. **II.** *n.* A metal made in imitation of bronze.— **bronz'ist**, *n.* A bronze-founder; a worker or dealer in bronzes.— **bronz'-ite**, *n. Mineral.* A dark-colored variety of enstatite containing iron.— **bronz'i-tite**, *n. Petrol.* A massive rock composed wholly of bronzite.— **bronz'y**, *a.* Resembling bronze.

A Bronzewing (*Phaps chalcoptera*). 1/7

bronz'ing, 1 bronz'iŋ; 2 brŏnz'ing, *n.* **1.** Any process of giving metal, wood, plaster, rattan, etc., a surface resembling bronze. **2.** A metallic bronze tint. **3.** Any material for giving a bronze color.— **bronz'ing-ma-chine"**, *n.* A machine for applying bronze-powder, as in decorative printing, wall-papers, etc.— **b.-salt**, *n.* Same as BRONZE-LIQUOR.

broo[1], 1 brū; 2 brōō, *n.* [Scot.] The brow.

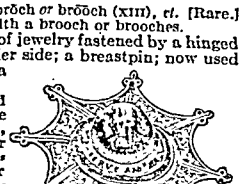
broo[2], 1 brū *or* brü; 2 brōō *or* brü, *n.* [Scot.] Juice; liquid; broth; bree.

brooch, 1 brōch *or* brūch; 2 brōch *or* brōōch (XIII), *vt.* [Rare.] To ornament with or as with a brooch or brooches.

brooch[1], *n.* **1.** An article of jewelry fastened by a hinged pin and hook on the under side; a breastpin; now used chiefly by women as a fastening or ornament.

Brooches are often named (1) from the place where worn; as, **neck-brooch, shoulder-b.**; (2) from their shape; as, **ring-b., shield-b.**; (3) from the material or design; as, **gold b., mourning-b.**

And thereon hung a *brooch* of gold full sheen.
CHAUCER *C. T. Prologue* l.160.



An Ancient Scottish Brooch.

2†. Any jewel, ornament, or trinket, as a bracelet, necklace, etc. [= BROACH, *n.*]

brooch†; **brochet.**

brooch[2], *n.* A monotint, as a sepia or India-ink sketch.

brood, 1 brūd; 2 brōōd, *v.* **I.** *t.* **1.** To cover beneath the body and wings; sit over, so as to give warmth and protection; as, a large hen can brood many eggs or chicks. **2.** To cherish or nurse. **3.** [Rare.] To meditate or ponder.

If a man *broods* dishonest thoughts, he is a knave.
H. W. BEECHER in *Life Thoughts* p. 115. [P. S. & CO. 1858.]

II. *i.* **1.** To sit, as a bird, on eggs, or to crouch over something with ruffled wings; hence, figuratively, to sit on or hang over something so as to cover, as darkness, silence, etc. **2.** To meditate long or moodily; think persistently; as, he *brooded* over his troubles. Syn.: see MUSE.— **brood'ing**, *pa.*— **brood'ing-ly**, *adv.*

brood[1], *a.* **1.** Having young, as a sow. **2.** Kept for breeding purposes, as a *brood* bitch. **3.** Broody.

brood[2]†, *a.* Broad.

brood, *n.* **1.** All the young birds hatched or cared for at one time by one mother, or in one artificial brooder; also, all the young of the same female; offspring; progeny; as, a *brood* of ducks; a serpent's *brood*.

A monstrous *brood* of vampyre bats. BROWNING *Pied Piper* st. 5.

2. Anything produced or bred; species; kind; race; as, the *broods* of the marshes; a heretical *brood*. **3.** Tin or copper ore mixed with impurities such as black-jack or mundic. **4.** *Zool.* (1) The larvæ or young of bees while in the brood-cells. (2) The pupæ of ants. (3) The spat of oysters in its second year. (4)† The process of hatching or breeding. **5†.** Fry of fishes. **6†.** Parentage; nativity. [< AS. *brōd.*] **brodt.** Syn.: see FLOCK.— **brood'-bud"**, *n. Bot.* **1.** A soredium. **2.** A bulbil.— **b.-cell**, *n.* **1.** A cell in honeycomb in which a larva is reared. **2.** *Bot.* Any unicellular reproductive body produced asexually and separating from the parent, as a gonidium.— **b.-comb**, *n.* That portion of the honeycomb in which young bees are reared.— **b.-cup**, *n. Bot.* A structure produced upon the thallus of liverworts, bearing buds or gemmæ.— **b.-food**, *n. Apiculture.* A substance derived from pollen by digestion, and serving as pap for a brood of bees.— **b.-gemma**, *n. Bot.* A multicellular propagative body not differentiated into stem and leaf, produced asexually and separating from the plant.— **b.-mare**, *n.* A mare used for breeding.— **b.-nest**, *n. Apiculture.* The space inside a hive occupied by the eggs and brood, or where the queen and bees are clustered.— **b.-pouch**, *n.* The pouch in which some animals, as crustaceans, carry their young or develop their eggs. **b.-cavity†; b.-space†.**

broode'axe"†, *n.* A broadax.

O judgment! thou art fled to *brutish* beasts.
SHAKESPEARE *Julius Cæsar* act iii, sc. 2, l. 109.

SYN.: animal, base, beastly, bestial, brutal, brute, carnal, coarse, ignorant, insensible, lascivious, sensual, stolid, stupid, swinish, vile. A *brutish* man simply follows his *animal* instincts, without special inclination to do harm: the *brutal* have always a spirit of malice and cruelty. *Brutal* seems rather to imply coarseness or deficiency of feeling for other sentient beings; *brutish* refers more to coarseness or deficiency of intelligence, expressing itself in the form or manners. *Brute* has no special character, except as indicating what a brute might possess; much the same is true of *animal*, except that *animal* leans more to the side of sensuality, *brute* to that of force, as appears in the familiar phrase "*brute* force." Hunger is an *animal* appetite; it is a *brute* impulse that inclines one to strike a blow in anger. *Bestial*, in modern usage, implies an intensified and degrading animalism. Any supremacy of the *animal* or *brute* instincts over the intellectual and spiritual in man is *base* and *vile*. *Beastly* refers largely to the outward and visible consequences of excess; as, *beastly* drunkenness.— ANT.: elevated, enlightened, exalted, grand, great, humane, intellectual, intelligent, noble, refined.— **brut'ish-ly,** *adv.*— **brut'ish-ness,** *n.*

They are distinguished from the thallophytes by the structure of their sex-organs, antheridia, and archegonia, these resembling the sex-organs of the *Pteridophyta*, the most highly developed of the cryptogams. The life history of bryophytes presents a regular alternation of generations. The gametophyte, which constitutes the plant, is the conspicuous form. The the sporophyte is practically a sporogonium, it presents indications of differentiation of root and shoot but remains attached to the gametophyte. From the latter it draws most of its nutriment. Fertilization occurs when the plants are wet with rain or dew. A few bryophytes are true aquatics, but many species have adapted themselves to dry regions, altho most of these cryptogams prefer a moist habitat. Traces of bryophytes occur as far back as the early Jurassic, but do not become abundant until the Oligocene. Spiritual awakening came to him while seated under a fig- or pippul-tree (see BO-TREE), and he thenceforward preached the gospel of Buddhism throughout the Ganges region. See BUDDHISM.

Colossal Buddha at Kamakura, Japan.

Gotama belonged to the Sakya tribe and is therefore frequently styled Sakyamuni ("Sakya sage"); he is called also Siddhartha, "he who gains his end."

The *Buddha* has not escaped the fate which has befallen the founders of other religions; and as late as the year 1854 Professor Wilson of Oxford read a paper before the Royal Asiatic Society of London in which he maintained that the supposed life of *Buddha* was a myth, and '*Buddha* himself merely an imaginary being.' No one, however, would now support this view, and *it is admitted that, under the mass of miraculous tales which* have been handed down regarding him, there is a basis of truth already sufficiently clear to render possible an intelligent history.

Bud'dhism, 1 bud'izm; 2 bud'ism (XIII), *n.* A mystic and ascetic religious faith and cult, which originated in northern Hindustan as a reformation of Brahmanism, or the old Hindu pantheism, and is widely prevalent in central and southern Asia. Its adherents have been variously estimated at from 100,000,000 to 400,000,000.

The gospel of Buddhism, based on the teachings of Gotama Siddhartha (see BUDDHA, 2), may be epitomized as follows:

Ignorance is the root of all evil. Four sublime truths point out the path that leads to Nirvana, which renders one "above birth, disease, suffering, old age, and death." These four truths are: (1) Life is sorrow; (2) the cause of suffering is desire; (3) conquest of self means freedom from desire; (4) an eight-fold path leads to the cessation of sorrow. This path consists in: (1) Right comprehension; (2) right resolutions; (3) right speech; (4) right action; (5) right mode of life; (6) right efforts; (7) right thought; (8) right peaceful-mindedness. In the Buddhist temples the doctrines of Gotama Buddha are inculcated; and an order of monks, under vows of celibacy and poverty, exemplify and promote this faith. **Boodh'ism‡.**

Buddhism, as a religion and as a political fact, was a reaction against Brahmanism, though it retained much of that more primitive form of faith and worship.
MAX MÜLLER *Chips* vol. i, p. 234. [S. 1874.]

Buddhism is a . . . reformation of Brahminism, and an . . . advance upon it. It adds to Brahminism a proposed method of escape, from this perpetual round of life and death, into Nirvana, or the Buddhist perfect life or heaven. Its central idea is, 'the selfish salvation of the individual soul from the rounds and changes of continued earthly existence, by contemplation of truth, and good works.' Death is its salvation: personal annihilation, its heaven.
D. S. GREGORY *Christian Ethics* pt. i, p. 162. [E. & BRO. 1870.]

bull², 1 bul; 2 bu͝l, *n.* **1.** An official and authoritative document issued by the Pope, usually an edict, decree, or other official proclamation, sealed with a bulla.

Bulls are named after the word or phrase introducing the main body of the subject-matter and are dated from "the day of the Incarnation." Among famous bulls are *Inter Cætera,* issued in 1493 by Alexander VI., settling upon a meridian 100 leagues west of the Azores as the dividing line between the Spanish and Portuguese empires in the New World, Spain taking all discoveries to the west and Portugal all those to the east of this line; on the strength of which Spain claimed the entire American continent; *Exsurge Domine,* issued by Leo X. against Martin Luther in 1520; *In Cœna Domini,* against heretics (see IN CŒNA DOMINI); and *Unigenitus,* issued by Clement XI. in 1713 against the Jansenists.

A papal *bull* bestowed on Spain all the countries which lay within the tropics west of the Atlantic.

FROUDE *Eng. in the West Indies* ch. 3, p. 27. [s. 1888.]

2. Same as BULLA, 1. **3.** Any official letter or edict, especially one anciently issued by the German or Roman emperor. [< LL. *bulla,* edict, seal, < L. *bulla,* boss.] **bullet.— Golden bull** (*Ger. Hist.*), one of several edicts, especially the one issued by the emperor Charles IV. in 1356 by which the election of the emperor was entrusted to seven electors: so called from the gold case which contained the seal.

bull³, *n.* An expression the terms of which are absurdly inconsistent or contradictory; a ridiculous contradiction in terms, as in "I make my own imported cigars."

Ireland makes up for her want of practical sagacity by the wit of her writers, the readiness of her repartees, and the drollery of her *bulls.* S. S. COX *Why we Laugh* p. 23. [b. 1876.]

No foundation appears for the guess that the word originated in a 'contemptuous allusion to papal edicts,' nor for the assertion of the 'British Apollo' . . . that 'it became a Proverb from the repeated Blunders of one Obadiah Bull, a Lawyer of London, who liv'd in the Reign of K. Henry the Seventh.' [M.] [Cp. OF. *boule,* fraud.] Syn.: see ERROR.

SYN.: blaze, brand, cauterize, char, consume, cremate, flame, flash, ignite, incinerate, kindle, scorch, set fire to, set on fire, singe. To *burn* is to subject to the action of fire, or of intense heat, so as to effect either partial change or complete combustion; as, to *burn* wood in the fire; to *burn one's hand on a hot stove*; the *sun burns* the face. One *brands* with a hot iron, but *cauterizes* with some corrosive substance, as silver nitrate. *Cremate* is now used specifically for *consuming* a dead body by intense heat. To *incinerate* is to reduce to ashes; the sense differs little from that of *cremate*, but it is in less popular use. To *kindle* is to *set on fire*, as if with a candle; *ignite* is the more learned and scientific word for the same thing, extending even to the heating of metals to a state of incandescence without burning. To *scorch* and to *singe* are superficial, and to *char* usually so. Both *kindle* and *burn* have an extensive figurative use; as, to *kindle* strife; to *burn* with wrath, love, devotion, curiosity.— ANT.: cool, extinguish, put out, smother, stifle, subdue.— PREP.: to burn *in* the fire; burn *with* fire; burn *to* the ground; burn *to* ashes; burn *through* the skin, or the roof; burn *into* the soil, etc.

SYN.: affair, avocation, barter, calling, commerce, concern, craft, duty, employment, job, occupation, profession, trade, transaction, vocation, work. A *business* is what one follows regularly; an *occupation* is what he happens at any time to be engaged in; trout-fishing may be one's *occupation* for a time, as a relief from *business*; *business* is ordinarily for profit, while the *occupation* may be a matter of learning, philanthropy, or religion. A *craft* is some occupation requiring technical skill or manual dexterity, or the persons, collectively, engaged in its exercise; as, the weaver's *craft*. A *profession* implies scholarship; as, the learned *professions*. *Pursuit* is an *occupation* which one follows with ardor. An *avocation* is what calls one away from other work; a *vocation*, or *calling*, that to which one is called by some special fitness or sense of duty; thus, we speak of the gospel ministry as a *vocation* or *calling*, rather than a *business*. *Trade* or *trading* is, in general, the exchanging of one thing for another; in the special sense, a *trade* is an *occupation* involving manual training and skilled labor; as, the ancient Jews held that every boy should learn a *trade*. A *transaction* is a single action, whether in *business*, diplomacy, or otherwise; *affair* has a similar but lighter meaning; as, this little *affair*; an important *transaction*. The plural *affairs* has a distinctive meaning, including all activities in which men deal with one another on any considerable scale; as, a man of *affairs*. A *job* is a piece of work viewed as a single undertaking, and ordinarily paid for as such. *Trade* and *commerce* may be used as equivalents, but *trade* is capable of a more limited application; we speak of the *trade* of a village, the *commerce* of a nation. *Barter* is the direct exchange of commodities; *business*, *trade*, and *commerce* are chiefly transacted by means of money, bills of exchange, etc. *Business*, *occupation*, etc., may be what one does independently; *employment* may be in the service of another. *Work* is any application of energy to secure a result, or the result thus secured; thus, we speak of the *work* of God. See DUTY.— PREP.: the business *of* a druggist; in business *with* his father; doing business *for* his father; have you business *with* me? business *in* New York; business *about*, *concerning*, or *in regard to* certain property.

— to do the business for [Colloq.], to settle completely; hence, to kill, destroy, or ruin.— **to make (a thing) one's b.** [*Colloq.*], *to undertake to accomplish (a particular thing).* **— to mean b.,** to be in earnest.— **to mind one's own b.,** to refrain from meddling; attend to one's own affairs.

I care not, not I—let the critics go whistle.
BURNS *Fragment, To C. J. Fox* st. 1.

[< Ice. *bustla*, bustle, splash about as a fish; cp. Dan. *buse*, bounce.]— **bus'tler,** *n.* A bustling person.

bus'tle¹, *n.* **1.** Activity with excitement and hurry; noisy stir; fuss. **2.** [Archaic.] A conflict; fray.

bus'tle², *n.* A pad or frame worn by women on the back below the waist to distend the skirts. [< BUSK¹, *n.*, influenced in form by BUSTLE,¹ *v.*]

bus'tle-pipe", 1 bus'l-paip"; 2 bŭs'l-pip", *n.* The large outside air-supply pipe of a blast-furnace.

bus'tling, 1 bus'lıŋ; 2 bŭs'ling, *pa.* Full of or characterized by bustle; agitated; stirring. SYN.: see ACTIVE; ALERT; NIMBLE.

bus'to, 1 bus'to; 2 bŭs'to, *n.* [It.] [Rare or Obs.] A bust.

Bus'to-Ar-si'zi-o, 1 bus'to-ar-si'tsi-o; 2 bus'to-är-si'tsi-o, *n.* A town in Milan province, Italy.

Bus'tos, 1 bus'tōs; 2 bus'tŏs, *n.* A town in Bulacan province, Luzon, P. I.

Bu"su-an'ga, 1 bû"sū-āŋ'gə; 2 bų"su-äŋ'gä, *n.* An island of the Calamianes group, P. I.; 500 sq. m.

bus'y, 1 biz'ı; 2 bĭş'y, *v.* [BUS'IED; BUS'Y-ING.] **I.** *t.* **1.** To make busy; keep in employment; engage; interest; oftenest reflexively; as, he *busies* himself about many things; to *busy* oneself with trifles. **2†.** To disturb or agitate, as the sea or other object.

II. *i.* To be busy; occupy oneself. [< AS. *bysgian*, < *bysig*, active.] SYN.: see OCCUPY.

bus'y, *a.* [BUS'I-ER; BUS'I-EST.] **1.** Actively engaged in something that engrosses the attention; constantly or habitually occupied, as in some employment; *devoted to* business; as, a *busy* housewife; *busy* in God's service.

It is possible that the word *busy* may have had that sort of share in the production of the great English word business which may be called the ushering of the word.
EARLE *Philol. Eng. Tongue* § 10, p. 90. [CL. P. 1873.]

2. Constantly active; as, *busy* tongues, feet, or hands. **3.** Temporarily engaged; not at leisure. **4.** Officiously active; prying; meddling; as, a *busy* gossip. **5.** Marked by or pertaining to active, continuous work or duty; filled with business; as, a *busy* day. **6.** *Telephone.* Engaged: said of a line or number. **7†.** Anxious; requiring care. [< AS. *bysig*, active.] **bes'y†.**

SYN.: active, diligent, employed, engaged, industrious, occupied. *Busy* applies to an activity which may be temporary, *industrious* to a habit of life. We *say* a man is *busy* just now; that he, *occupied* at the moment with something *that takes his full attention*. It would be ridiculous or satirical to say, he is *industrious* just now. But *busy* can be used in the sense of *industrious*, as when we say he is a *busy* man. *Diligent* indicates also a disposition, which is ordinarily habitual, and suggests more of heartiness and volition than *industrious*. We *say* one is a *diligent*, rather than an *industrious*, reader of the Bible. In the use of the nouns, we speak of plodding *industry*, but not of plodding *diligence*. See ACTIVE.— Compare AS-IDUITY.— ANT.: careless, dilatory, dull, idle, inactive, indolent, lazy, listless, negligent, remiss, slack, slothful.— PREP.: busy *at* work; *about*

trifles; *in* an enterprise; *with* the cashier; *with, about,* or *over* his accounts.

— **bus'y-ish,** *a.* Somewhat busy.— **bus'y-ness,** *n.* The state of being busy: distinguished from BUSINESS.

bus'y-bod‖'y, 1 biz'ı-bod'ı; 2 biz'y-bŏd'y, *n.* [-IES, 1 -iz; 2 -is, *pl.*] One who officiously or habitually meddles with the affairs of others; a meddler.— **bus'y-bod‖'ied, bus'y-bod‖'y-ish,** *a.* Meddlesome.— **bus'y-bod‖'y-ism,** *n.* The habit of being a busybody.— **bus'y-bod‖'y-ness,** *n.* The condition of being a busybody.

but[1], 1 but; 2 bŭt, *v.* [BUT'TED; BUT'TING.] To abut.

but[2], *v.* [Rare.] To exclaim 'but.'

but[1], *n.* A verbal objection, restriction, exception, or condition; as, without any ifs or *buts.*

but[2], *n.* [Scot.] The kitchen or outer room of a two-roomed house; as, a *but* and a ben are enough. **butt‡.**

but[3], *n.* [Local, Eng.] A flounder.

but, *adv.* **1.** Not otherwise than; no more than; only; merely; simply; as, there is *but* one God; we made *but* one trip; I left him *but* now.

Such lofty strains embellish what you teach;
Mean you to prophesy, or *but* to preach?
COWPER *Table Talk* l. 480.

But is sometimes used as a mere expletive; sometimes, perhaps, merely to add emphasis by repetition.

I conjure, only *but* to raise up him.
SHAKESPEARE *Romeo and Juliet* act ii, sc. 1.

2. [Scot.] In or to the outer room or outer air; to the outside; out; without; as, bring it *but;* gae *but.*

— **all but,** almost; nearly; as, he was *all but* dead.— **to be but and ben with,** to live in close intimacy with.

but, *prep.* **1.** Leaving out; with the exception of; except: in modern usage treated as a conjunction, an objective pronoun following being now considered colloquial; as, all *but he* agreed to it.

Since none puts by The curtain I have drawn for you, *but* I.
BROWNING *My Last Duchess* l. 9.

2. [Scot.] Apart from; without; destitute of; as, a child *but* a gown; a man *but* skaith or scar. **3.** [Scot.] Outside of; out of; without; as, to gang *but* the house.

but, *conj. But* has many and varied uses, so that it is often difficult or impossible to decide whether the word is a *conjunction,* a *preposition,* an adverb, or a particle having various offices. As the typical word used in the adversative coordination of sentences, *but* expresses fundamentally opposition, exception, or exclusion, but its meaning is often restricted to slight transition or simple continuance.

The most important of these particles [of adversative coordination] *is but,* which rules the whole adversative field, and always stands at the commencement of the sentence or member. MAETZNER *Eng. Gram.* tr. by Grece, vol. iii, p. 358. [H. BROS. 1874.]

1. Omitting or excluding the fact that; with the exception that; except: denoting simple omission, exception, or exclusion; as, the family went to church, *but* John stayed at home.

The waves do not rise *but* when the winds blow.
BANCROFT *United States* vol. ii, p. 527. [A. 1890.]

But for conscience, there would be no check to vice.
R. WATSON *Sermons* vol. ii, p. 238. [M. & L. 1836.]

2. Otherwise than (that); in every direction except (that); more than (that): denoting opposition with difference; as, it can not be *but* (that) the man is honest.

But often indicates exclusion through necessity, impossibility, inability, etc., being preceded by a negative.

We cannot *but* believe that there is an inward and essential truth in art. CARLYLE *Essays, Goethe* vol. i, p. 237. [H. M. & CO.]

3. Still, on the contrary; yet, on the other hand; nevertheless; however: denoting opposition with contrast.

The cross their standard, *but* their faith the sword.
MONTGOMERY *The West Indies* pt. i, st. 11.

4. Tho it be true that; however that may be; notwithstanding; tho; even if: denoting opposition with concession; as, he is rich, *but* he might be richer; you must go now, *but* you may come again.

They prevented me in the day of my calamity: *but* the Lord was my stay. *Ps.* xviii, 18.

And, *but* she spoke it dying, I would not Believe her lips.
SHAKESPEARE *Cymbeline* act v, sc. 5.

5. In addition to that; moreover; besides; again: denoting slight opposition, transition, or continuance, and approaching the meaning of *and.*

But where is she, the bridal flower?
TENNYSON *In Memoriam* con., st. 7.

6. From the fact that; that it is a fact that; that: furnishing the explanation or ground of what precedes: often *but that,* either word being omitted at pleasure.

It must not be denied *but* I am a plain-dealing villain.
SHAKESPEARE *Much Ado About Nothing* act i, sc. 3.

7. When; before; than.

Scarce had I left my father, *but* I met him
Borne on the shields of his surviving soldiers.
ADDISON *Cato* act iv, sc. 4.

8. Who . . . not; that . . . not; where an omitted pronoun is the object of a main sentence or the subject of a dependent one *but* becomes a negative relative, equivalent to the Latin *quin;* as, No man *but* felt the terror.

As for the birds, I do not believe there is one of them *but* does more good than harm. LOWELL *My Study Windows, Garden Acquaint.* p. 23. [O. & CO. 1871.]

9. [Archaic.] If not; unless; as, It is ten to one *but* Peter is among them. [< AS. *būtan,* except, without, orig. adv., outside, < *be-* (see BE-) + *ūtan,* out.]

SYN.: and, barely, besides, except, however, just, merely, more, nevertheless, notwithstanding, only, provided, save, still, that, tho, unless, yet. *But* ranges from the faintest contrast to absolute negation; as, I am willing to go, *but* (on the other hand) content to stay; he is not an honest man, *but* (on the contrary) a villain. The contrast may be with a silent thought; as, *but* let us go (it being understood that we might stay longer). In restrictive use, *except* and *excepting* are slightly more emphatic than *but;* we say, no injury *but* a scratch; or, no injury *except* some painful bruises. Such expressions as "words are *but* breath" (nothing *but*) may be referred to the restrictive use by ellipsis. So may the use of *but* in the sense of *unless;* as, "It never rains *but* it pours." To the same head must be referred the conditional use; as, "you may go, *but* with your father's consent" (*i. e.,* "*provided* you have," "*except* that you must have," etc.). "Doubt *but*" is now less used than the more logical "doubt *that.*" *But* never becomes a full synonym for *and;* *and* adds something like, *but* adds something different; "brave *and* tender" implies that tenderness is natural to the brave; "brave *but* tender" implies that bravery and tenderness are rarely combined. For the concessive use, see NOTWITHSTANDING.

— **but and** [Scot.], and also; but also.— **but and if,** but if; if.— **but that,** otherwise than that: except for the fact that. *But* is in many cases redundant before *that,* but is often in other cases required by the sense. In "Each by the other would have done the like *but that* they lacked the courage," *but* is essential, as introducing a reason or consideration to the contrary. The omission or insertion of *but* often reverses the meaning. "I have no fear *that* he will do it" and "I have no fear *but that* he will do it" have contrary senses, the former indicating the feeling of certainty *that he will not do it,* and the latter the feeling of certainty *that he will do it.* Where ambiguity or haziness results from the use of *but that,* it can ordinarily be avoided by changing the form of the sentence; as, "There is no certainty *but that* he will come" may be changed to "There is no certainty *that* he will not come."— **but what,** an incorrect expression for *but that.*

2. [Colloq.] To flatter fulsomely. **3.** In gambling, to increase, as one's bet, by the addition of one's previous winnings.

but'ter¹, *n.* **1.** The fatty constituent of milk, especially cow's milk, from which it is commonly separated by agitation, as in churning: largely used in the household economy as an article of food.

In the domestic manufacture of *butter* the cream is collected and set aside until sour, that is, until lactic fermentation has been set up. When this is sufficiently advanced the cream is placed in a churn. . . . When the churn is charged the butter is produced by agitation with the dasher. . . . In dairies and large establishments churning is accomplished by machinery. . . . The crude butter secured by churning is subjected to washing and seasoning processes in order to prepare it for the market. The washing or working of butter is accomplished by means of water. The object of this working is to separate from the crude butter as much of the curd and other non-fatty constituents of the cream as can be conveniently removed. . . . According to the standard established by the authority of Congress *butter* must not contain more than 16 per cent. of water and not less than 82.5 per cent. of *butter* fat. H. W. WILEY *Foods and Their Adulteration* pp. 182–186. [n. d. & co. '11.]

The way to God is *by* the road of men.
EDWIN ARNOLD *Light of the World* bk. v, p. 225. [r. & w.]

2. Expressing the relation of agency, cause, means, or instrument: (1) Through the agency or means of; through; with; as, the rope hangs *by* a thread; he crossed the river *by* the bridge; he died *by* poison.

For we walk *by* faith, not *by* sight. *2 Cor.* v, 7.

(2) Through the direct action of; through the help of; as, he was helped *by* his father.

The distinction of the two particles in the modern language consists essentially in that *by* is referred to the object immediately operative as the independent bearer of the activity; with, on the other hand, to an object mediately operative, and participating in the activity. MAETZNER *Eng. Gram.* tr. by Greece, vol. ii, p. 414. [S. BROS. 1874.]

No one was ever yet made utterly miserable excepting *by* himself. J. LUBBOCK *Pleasures of Life* ch. i, p. 13. [J. B. A. 1887.]

(2) [Archaic.] Against; derogatory to.

I know nothing *by* myself [*against,* R. V.]. *1 Cor.* iv, 4.

This idiomatic use of 'by,' as equivalent to 'concerning,' . . . but with also a suggestion of 'against,' was not peculiar to our Translators. TRENCH *Select Glossary* p. 37. [K. P. & CO. 1890.]

8. In the name, presence, or view of: used in oaths or adjurations; as, *by* the gods. [< AS. *bi, big.*] **byef.**

Syn.: by means of, through, with. *By* refers to the agent; *through,* to the means, cause, or condition; *with,* to the instrument. *By* commonly refers to persons; *with,* to things; *through* may refer to either; hence *by* is properly used before the agent or doer, *with* before the instrument or means; as, "He was killed *by* the assassin *with* a dagger." But active forces are often thought of as agents, so that we properly say "The house was destroyed *by* fire." "His friends were displeased *by* the selection of another chairman" means that the action displeased them; "his friends were displeased *with* the selection," etc., means that the man selected was not their choice. The road having become impassable *through* long disuse, a way was opened *by* pioneers *with* axes. *By* may, however, be applied to any object which is viewed as partaking of action and agency; as, the metal was corroded *by* the acid; skill is gained *by* practise. We speak of communicating *with* a person *by* letter. *Through* implies a more distant connection than *by* or *with,* and more intervening elements. Material objects are perceived *by* the mind *through* the senses. See AT.

— **by all means,** certainly; on every account.— **by north, south, east, northeast,** etc. (*Naut.*), with deflection toward the north, etc.; as, our course was northeast *by* east, i. e., between northeast and east: used in navigation or boxing the compass.— **by oneself,** alone; apart; unassisted. — **by the ears,** in disagreement; at variance: commonly in the phrase *to set by the ears.* See under EAR.— **by the head or stern** (*Naut.*), drawing most water forward or aft: said of a vessel.— **by the run** (*Naut.*), entirely and at once; as, to let go *by the run.*— **by the way. 1.** On or beside the road. **2.** Incidentally; by the by.— **by trade** [Colloq.], in the exercise of, or professing, a trade; as, a tailor *by trade.*— **day by day, one by one, piece by piece,** each day, one, or piece, as the case may be, individually and separately.— **to come by,** to acquire.— **to set store by,** to esteem; hold as valuable or of worth.— **to stand by,** to stand up for; support.

C

Cc Roman. Black Letter. Script.

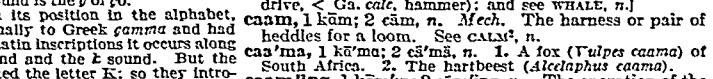
C, c, 1 sī; 2 çē. *n.* [CEES, C's, or *Cs*, 1 sīz; 2 çēş, *pl.*] **1.** A letter: the third in the English, Latin, and Romanic alphabets; in Latin and Anglo-Saxon called *ce* = kē.

Its sound is made by bringing the back surface of the tongue into contact with the opposite part of the faucal passage. The exact place of the contact depends on the character of the neighboring sounds; thus, it is farther back in *call* and *book* than in *keel* and *speak*. The process of pushing forward the point of articulation toward the *t* position is called 'palatalization.' Technically the *k* sound is called a 'voiceless guttural mute' ('explosive,' or 'stop'). The corresponding voiced sound is the *g* of *go*.

As one would infer from its position in the alphabet, Latin C corresponded originally to Greek *gamma* and had the same sound. In early Latin inscriptions it occurs along with K, both for the *g* sound and the *k* sound. But the Romans seem to have disliked the letter K; so they introduced, as early as the 3d century B. C., a modified form of C, namely, G, for the voiced *g* sound, and restricted C to the voiceless *k* sound. This is the value of *c* in classical Latin. In Low Latin, however, *c* began to be palatalized before a high vowel (*e, i, ae, oe, y*), and out of this palatalized *c* have developed various modern sounds such as *ch, ts, s, sh,* and *th*. Where the Romans said kikero (Cicero), the Italians say chichero, the French siserā, the Germans tsitsero, the Spanish thithero, the English sisaro.

In the Anglo-Saxon alphabet *c* had at first only the *k* sound, the modern *child* having been spelled *cild*. When the inevitable process of palatalization set in, the new sound, really a combination of *t* and *sh*, came to be denoted by *ch*, sometimes by *tch*. Then came Norman-French, with a multitude of words in which *c* now had the sound of *s*. These were retained with their French spelling, the *s* sound before an unstressed high vowel giving rise to *sh*, as in *ocean*. Hence arises our modern rule that *c* has the *s* sound (or the *sh* sound) before *e, i, y, ae,* and *oe*, elsewhere the *k* sound. Strictly speaking, the letter *c* is now redundant in our alphabet, since its various sounds can all be otherwise denoted.

The history of the characters may be shown as follows:



Hieroglyphic Throne. Egyptian Hieratic. Phenician. Early Greek. Early Latin.

C is from L. **C** (3d cent. B. C.), which stood for both Gr. *g* and Gr. *k*, K being an unmanageable form in a rounded alphabet. See G. The black letter is monkish cacography (14th cent.). **C** is a rounding of Gr. Γ, gamma (7th cent. B. C.), < Gr. right to left 𐤂 < Phenician 𐤂, gimel, camel, < Egyptian hieratic 𓃀, < the Egyptian hieroglyph 𓃀, called *throne*. For dates, see A.

Hist.* The ministry formed in the reign of Charles II. after the fall of Clarendon (1667–1673). It was essentially a committee ("committee for foreign affairs") of the Privy Council, and was a forerunner of the modern cabinet. **cabţ.**

It happened by a whimsical coincidence that, in 1671, the cabinet consisted of five persons the initial letters of whose names made up the word *Cabal* — Clifford, Arlington, Buckingham, Ashley, and Lauderdale. These ministers were therefore emphatically called the *Cabal;* and they soon made that appellation so infamous that it has never since their time been used except as a term of reproach. MACAULAY *Eng.* vol. i. p. 165. [R. & CO. 1849.]

3. A design or work of joint intrigue; a factious scheme; as, court *cabals.* **4.** A secret meeting, especially of a faction. **5†.** The cabala. [< F. *cabale,* < Heb. *qabbālāh;* see CABALA.]

SYN.: combination, conclave, confederacy, conspiracy, crew, faction, gang. A *conspiracy* is a *combination* of persons for an evil purpose, or the act of so combining. *Conspiracy* is a distinct crime under common, and generally under statutory, law. A *faction* is more extensive than a *conspiracy,* less formal in organization, less definite in plan. *Faction* and its adjective, *factious,* have always an unfavorable sense. *Cabal* commonly denotes a *conspiracy* of leaders. A *gang* is a company of workmen all doing the same work under one leader; the word is used figuratively only of combinations which it is meant to stigmatize as rude and mercenary; *crew* is used in a closely similar sense. A *conclave* is secret, but of larger numbers, ordinarily, than a *cabal,* and may have honorable use; as, the *conclave* of cardinals. — **cabal system,** a system for memorizing in which the initials of the words to be memorized are combined with a vocable.

cab'a-la, 1 kab'ə-lə; 2 cab'a-la, *n.* **1.** A system of theosophy, originating in a mystical interpretation of the Scriptures among Jewish rabbis and certain Christian sects of the Middle Ages. Upon the assumption that every letter, number, and even accent of Scripture has an occult meaning, it developed a semipantheistic doctrine of emanation of the universe, of the supremacy of man's spirit over the invisible powers of evil as well as over his own desires, and a claim to penetrate all mysteries and to foretell the future. Compare SEPHIRA.

The term *Cabala* designates the esoteric doctrines of Judaism. . . . Although it claims to be a product of the tannaitic period . . . modern investigation has proved that it is purely a product of the Middle Ages. AUGUST WÜNSCHE *New S.-H. Relig. Encyc.* vol. ii, p. 326. [r. & w. '08.]

cab'i-net, *n.* **1.** [C-] The body of men constituting the official advisers of the executive head of a nation, and charged with the administration of the executive departments of the government. (1) [U. S.] The advisers of the President on public affairs, composed of the heads of the several executive departments (as arranged in the order of their Presidential succession), the Secretary of State, Secretary of the Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of the Navy, Secretary of the Interior, Secretary of Agriculture, Secretary of Commerce, and Secretary of Labor. They are appointed by the President by and with the advice and consent of the Senate, and are removable at the will of the President. The United States Cabinet as a body has no legal or constitutional authority, but is merely advisory. The President and ministers in the performance of their official duties may lawfully disregard its advice and act upon their individual responsibility.

At that time [1825] the notion that the accession of a new President must necessarily involve a thorough reconstruction of the *Cabinet*, was not yet invented.
CARL SCHURZ *Henry Clay* ch. 11, p. 258. [H. M. & CO. 1888.]

(2) [Gt. Brit.] Those members of the Privy Council who hold the highest offices of the state and who, under the leadership of the Prime Minister, carry on the imperial government. The Cabinet Council dates from 1693, during the reign of William III., but it was not until modern times that it gained its present position. The Cabinet must have at least eleven members, who fill the following offices: First Lord of the Treasury (usually the Prime Minister), the Lord Chancellor, the Lord President of the Council, the Lord Privy Seal (an office sometimes in commission), the five Secretaries of State, the Chancellor of the Exchequer, and the First Lord of the Admiralty. Until 1850 the Cabinet usually consisted of twelve members. Since then the number has varied from twelve to twenty-three. The members are usually chosen by the Prime Minister from the party in office at the time, guided by the opinion of the electorate. To the first Cabinet of George V., the Chief Secretary for Ireland, President of Local Government Board, Postmaster-General, and Chancellor of the Duchy of Lancaster were added. The present Cabinet (1918) consists of only six members, of whom three do not have portfolios. Compare CABAL; PRIVY COUNCIL. The Cabinets of the British colonies are of like character. (3) [France.] A purely political body, which drafts legislation, but is not recognized by the constitution. It is known as the council. **2.** The secret council of a government or a church; a private meeting of state or church officials; in the Methodist Episcopal Church, a bishop with the district superintendents of a conference. **3.** The chamber in which a cabinet meets. **4.** Any room or rooms set apart for keeping or displaying works of art or virtu, scientific collections or apparatus, etc.; also, the articles so collected.

To one black ash. TENNYSON *Harold* act iii, sc. 1.

II. *i.* To become changed by the action of dry heat into a friable substance or powder. [< F. *calciner,* < LL. *calcino,* < L. *calx* (*calc-*), lime.] **cal'cin-ize†; cal'cin-atet.— cal'cin-a-bl(er,** *a.*— **cal'cin-er,** *n.* **1.** A calcining-kiln or -oven. **2.** One who calcines. **cal'cin-a"tort.**

cal'cine, *n.* Same as CHAMOTTE. [< CALCINE, *v.*]

cal-ci'no, 1 kal-chī'no; 2 căl-chīˈno, *n.* [It.] *Sericulture.* A disease of silkworms arising from the action of the fungous parasites *Botrytis bassiana* and *B. tenella* which paralyzes the worms and causes them to turn a reddish color before death, and afterward chalk-white.

cal"ci-o-cel'es-tite, 1 kal'sı-o-sel'es-tait; 2 călˈçi-o-çēlˈes-tīt, *n. Mineral.* A variety of celestite containing calcium. [< CALCIUM + CELESTITE.]

cal"ci-o-fer'rite, 1 kal'sı-o-fer'ait; 2 călˈçi-o-fĕrˈīt, *n. Mineral.* A yellowish hydrated calcium-iron phosphate ($Ca_3Fe_2(OH)_2(PO_4)_4 8H_2O$), usually found in nodules. [< CALCIUM + FERRITE.]

cal'ci"on, 1 kal'sai"on; 2 călˈçi"ŏn, *n. Chem.* Ionic calcium.

cal"ci-o-tan'ta-lite, 1 kal'sı-o-tan'tə-lait; 2 călˈçi-o-tănˈta-līt, *n. Mineral.* A variety of tantalite containing calcium.

cal"ci-o-tho'rite, 1 kal'sı-o-thō'rait; 2 călˈçi-o-thōˈrīt, *n. Mineral.* A variety of thorite containing calcium. [< CALCIUM + THORIUM.]

cal"ci-o-vol'borth-ite, 1 kal'sı-o-vel'bôrth-ait; 2 călˈçi-o-vŏlˈbôrth-īt, *n. Mineral.* A green, hydrous copper-calcium vanadinate ($H(CuCa_2)VO_5$), crystallizing in the hexagonal system. [< CALCIUM + VOLBORTHITE.] **calc-vol'borth-itet.**

cal-ciph'i-lous, 1 kal-sif'ı-lus; 2 căl-çifˈi-lŭs, *a.* **1.** Fond of chalk. **2.** *Bot.* Lime-loving; said of plants that grow best in soils containing lime. [< CALCI- + Gr. *philō,* love.]

cal-ciph'o-bous, 1 kal-sif'o-bus; 2 căl-çifˈo-bŭs, *a. Bot.* Not thriving on soils rich in lime. [< CALCI- + *phobeā,* fear.]

cal'ci-phyre, 1 kal'sı-fair *or* -fir; 2 călˈçi-fīr *or* -fīr, *n.* A lime-rock recrystallized through metamorphic agency. [< CALCI- + *-phyr-* in PORPHYRY.]

cal"ci'ru-dite, 1 kal'sı-rū'dait; 2 călˈçi-rųˈdit, *n. Petrol.* A conglomerate rock of broken or worn pieces of shell, coral, or limestone cemented with mud or limestone.

Cal"ci-spon'gi-æ, 1 kal'sı-spen'jı-ī; 2 călˈçi-spŏnˈgi-ē, *n. pl. Spong.* A section or subclass of sponges having a calcareous skeleton. [< CALCI- + L. *spongia;* see SPONGE.]— **cal'ci-sponge,** *n.*— **cal"ci-spon'gi-an,** *a. & n.*

cal'cite, 1 kal'sait; 2 călˈçit, *n. Mineral.* A widely diffused calcium carbonate ($CaCO_3$), usually colorless or whitish, found crystallized in the hexagonal system, chiefly as rhombohedrons or scalenohedrons, and also massive or cryptocrystalline. The crystallized varieties of calcites include corn-spar, dog-tooth spar, hog-tooth spar, Iceland spar, nail-head spar, and satin-spar; the massive varieties include chalk, limestone, marble, stalactite, and stalagmite. [< L. *calx* (*calc-*), lime.]— **cal-cit'ic,** *a.*

cal"ci-tes-ta'ceous, 1 kal'sı-tes-tē'shus; 2 călˈçi-tĕs-tāˈshus, *a.* Having a shell of calcium carbonate. [< CALCI- + TESTACEOUS.]

cal'ci-trant, 1 kal'sı-trənt; 2 călˈçi-trant, *a.* [Rare.] Kicking; hence, refractory; obstinate: more frequently, *recalcitrant.* [< L. *calcitran(t-)s,* ppr. of *calcitro,* kick, < L. *calx* (*calc-*), heel.]

cal'ci-trate, 1 kal'sı-trēt; 2 calˈçi-trāt, *vt. & vi.* [-TRAT'ED; -TRAT'ING.] To kick. [< L. *calcitratus,* pp. of *calcitro;* see CALCITRANT.]— **cal"ci-tra'tion,** *n.*

cal'ci-um, 1 kal'sı-um; 2 călˈçi-ūm, *n. Chem.* A silver-white, malleable, metallic element, never occurring free, but widely distributed in combination. See ELEMENT. [< L. *calx,* lime.]— **calcium acetate** (*Chem.*), a white soluble amorphous powder ($Ca(C_2H_3O_2)_2$). It is obtained in the production of wood-alcohol and used in the manufacture of acetic acid and acetone, and in dyeing.— **c. bicarbonate** (*Chem.*), a compound ($CaH_2(CO_3)_2$), unobtainable in a free state, but supposed to exist in a solution of calcium carbonate in water saturated with CO_2.— **c. bisulfite** (*Chem.*), a compound in liquid form, produced by bringing milk of lime in contact with an excess of sulfur dioxid (SO_2): used as a disinfectant and antiseptic, also in brewing, paper-making, and the manufacture of cellulose from wood. **c. sulfite†.— c. carbonate** (*Chem.*), a fine white amorphous powder ($CaCO_3$); used as a tooth-wash.— **c. chlorid** (*Chem.*), a white, very deliquescent, granulated powder ($CaCl_2$): used as a drying agent.— **c. cyanamid** (*Chem.*), a compound ($CaCN_2$), produced in the electric furnace by bringing the nitrogen of the air in contact with carbon and calcium oxid: an artificial fertilizer.— **c. fluorid** (*Chem.*), a white powder (CaF_2), which becomes luminous on the application of heat: used for etching glass and in the manufacture of enamels.— **c. hydroxid** (*Chem.*), slaked lime ($Ca(OH)_2$): also used in solution; lime-water.— **c. hypochlorite** (*Chem.*), a poisonous compound ($Ca(ClO)_2$): used as a disinfectant and bleaching-agent.— **cal'ci-um-light",** *n.* A powerful light produced by the incandescence of lime in an oxyhydrogen flame; the Drummond light.— **c. oxid** (*Chem.*), lime.— **c. oxychlorid** (*Chem.*) chlorid of lime.— **c. permanganate** (*Chem.*), a compound ($Ca(MnO_4)_2+5H_2O$), used to destroy pathogenic bacteria in water, also internally in gastric and intestinal diseases of children.— **c. phosphate** (*Chem.*), a phosphate of calcium, particularly the neutral phosphate ($Ca_3(PO_4)_2$), found in the mineral apatite and in bones.— **c. phosphid** (*Chem.*), a compound (Ca_3P_2), made by subjecting phosphate of lime to red heat. When brought into contact with water it decomposes, generating hydrogen phosphid, which immediately takes fire: used for signal-lights.— **c. plumbate** (*Chem.*), a compound (Ca_2PbO_4) in the form of a flesh-colored powder soluble in acids, used in the making of matches, accumulator batteries, etc., and, by subjecting it to a high degree of heat, in the manufacture of oxygen gas.— **c. silicate** (*Chem.*), a compound, insoluble in water or acids, forming the chief ingredient of hydraulic cement when set and hardened, and used in the manufacture of artificial stone.— **c. sulfate** (*Chem.*), a white powder ($CaSO_4$) used in the arts and for making plaster bandages for fractures; gypsum.— **c. sulfid** (*Chem.*), a compound (CaS) having the property of phosphorescence on exposure to sunlight. **Bal'main's paintt.— c. tungstate** (*Chem.*), a compound ($CaWO_4$), in the form of shining crystalline scales, used in screens for photography by Roentgen rays.

cal-civ'o-rous, 1 kal-siv'o-rus; 2 căl-çivˈo-rŭs, *a.* Living upon limestone: said of certain lichens. [< CALCI- + L. *vors,* eat.]

cal"co-aph'a-nite, 1 kal'ko-af'ə-nait; 2 călˈco-ăfˈa-nīt, *n. Petrog.* An altered variolitic diabase having calcite kernels embedded in the green ground mass.

cal-co-glob'u-lin, 1 kal-ko-glob'yu-lin; 2 căl-co-glŏbˈyu-lin, *n. Chem.* Calcium salts and albumin combined in the process of ossification. [< L. *calx* (*calc-*) lime, + GLOBULIN.]

cal-cog'ra-phy, 1 kal-kog'rə-fi; 2 căl-cŏgˈra-fy, *n.* The art of drawing with colored chalks or pastels. [< L. *calx,* lime, + -GRAPHY.]— **cal-cog'ra-pher,** *n.*— **cal'-co-graph-ic, cal"-co-graph'i-cal,** *a.*

Cal'col, 1 kal'kol; 2 călˈcŏl, *n. Bib.* 1 *Chron.* ii, 6.

cal"co-mal'a-chite, 1 kal'ko-mal'ə-kait; 2 călˈco-măl'a-cīt, *n.* A malachite containing calcite and gypsum.

cal-coph'o-rous, 1 kal-kof'o-rus; 2 căl-cŏfˈo-rŭs, *a.* Producing or yielding lime. [< L. *calx,* lime, + Gr. *pherō,* bear.]

cal"co-sphæ-rit'ic, 1 kal'ko-sfı-rit'ik; 2 călˈco-sfĕ-rıtˈic, *a.* Calcareous and orbicular, as minute concretionary bodies in pearl-producing bivalves. [< L. *calx,* lime, + SPHÆRITE.]

cal'crete, 1 kal'krit *or* kal-krit'; 2 călˈcrēt *or* căl-crētˈ, *n.* A rock formed on the sea-bottom from sand, shell, etc., cemented by calcareous polyzoans. [< L. *calx,* lime; cp. CONCRETE.]

cal'cu-la-ble, } 1 kal'kiu-lə-bl; 2 călˈcu'la-bl, *a.* **1.** Ca-
cal'cu-la-bl", } pable of being calculated; that may be estimated by reckoning. **2.** Designating persons of dependable character.

The force of selfishness is as inevitable and as *calculable* as the force of gravitation. G. S. HILLARD *Six Months in Italy* vol. ii, ch. 4, p. 94. [t. & r. 1854.]

2. [Rare.] That may be depended upon, as applied to personal actions or character. [< L. *calculo;* see CALCULATE.]— **cal"cu-la-bil'i-ty,** *n.*

cal'cu-la-graph, 1 kal'kiu-lə-graf; 2 călˈcū-la-grăf, *n.* A mechanism consisting of a clock and levers for recording elapsed time, as of a call in a telephone exchange, or for indicating the time taken to perform a piece of work. [< L. *calculo* (see CALCULATE), + Gr. *grapho,* write.]

cal'cu-lar, 1 kal'kiu-lar; 2 călˈcū-lar, *a.* Of or pertaining to a calculus. **cal'cu-la-ryt.**

cal'cu-la-ry, 1 kal'kiu-lē-rı; 2 călˈcū-lā-ry, *n.* [-RIES, 1 -rız; 2 -rig, *pl.*] **1.** *Bot.* An aggregation of stony knots or concretions found in the pulp of the pear and other fruits. **2.** *Pathol.* A calculus. [< L. *calcularius,* < *calculus,* pebble; see CALCULUS.]

cal'cu-late, 1 kal'kiu-lēt; 2 călˈcū-lat, *v.* [-LAT'ED; -LAT'ING.] **I.** *t.* **1.** To compute mathematically; ascertain by computation; find out beforehand the time or circumstances of, as an eclipse; reckon; as, to *calculate* expenses; to *calculate* the return of a comet.

People in Ashurst moved in orbits *calculated* before they were born. A. S. HARDY *Wind of Destiny* p. 42. [H. M. & CO. 1890.]

2. To think or study out; form an estimate of; as, to *calculate* the chances of success. **3.** To plan or arrange; think out; devise; as, the room is not *calculated* for such uses; a *calculated* slowness of speech. Compare CALCULATED. **4.** [Local, U. S.] To intend; purpose; as, do you *calculate* to ride?

We *calculate* to go down to the New Orleans Centennial.
C. D. WARNER *Their Pilgrimage* p. 17. [H. 1887.]

5. [U. S.] To think; guess; as, I *calculate* you are right.

II. *i.* **1.** To form an estimate; perform calculations; reckon; count; as, I *calculate* on a good trade. **2.** [Colloq., U. S.] To think, suppose, or believe after consideration or deliberation; reckon.

Your aunt sets two tables, I *calculate,* don't she?
SUSAN WARNER *Queechy* vol. i, p. 271. [L. 1873.]

3†. To speculate as to the future. [< L. *calculatus,* pp. of *calculo,* < *calculus,* pebble; see CALCULUS.]

SYN.: account, compute, consider, count, deem, enumerate, estimate, number, rate, reckon, sum up. *Number* is the generic term. To *count* is to *number* one by one. To *calculate* is to use more complicated processes, as multiplication, division, etc., more rapid but not less exact. *Compute* allows more of the element of probability, which is still more strongly expressed by *estimate.* We *compute* the slain in a great war from the number known to have fallen in certain great battles; *compute* refers to the present or the past, *estimate* more frequently to the future; as, to *estimate* the cost of a proposed building. To *enumerate* is to mention item by item; as, *enumerate* one's grievances. To *rate* is to *estimate* by comparison, as if the object were one of a series. We *count* upon a desired future; we do not *count* upon the undesired. As applied to the present, we *reckon* or *count* a thing precious or worthless. See ESTEEM.— Prep.: calculate *on* or *upon* the result.

cal'cu-lat"ed, 1 kal'kiu-lēt"ed; 2 călˈcū-lāt"ĕd, *pa.* **1.** Especially designed or adapted; planned. **2.** Hence, adapted; suited; proper; fit; tending: the common modern meaning; as, he is well *calculated* for a lawyer. Compare CALCULATE, 3.

An immense metropolis like London is *calculated* to make men selfish and uninteresting.
IRVING *Sketch-Book, Rural Life in Eng.* p. 82. [G. P. P. 1863.]

3. Likely to have a certain result.

cal'cu-lat"ing, 1 kal'kiu-lēt"ıŋ; 2 călˈcū-lāt"ing, *pa.* Inclined to reckon or estimate, especially one's own chances or interests; planning; scheming; as, a *calculating* politician. SYN.: businesslike, careful, cautious, circumspect, guarded, keen, mercenary, wary, watchful, wily. Compare synonyms for ASTUTE.— ANT.: careless, easy-going, free-and-easy, improvident, impulsive, incautious, neglectful, negligent, rash, short-sighted, thriftless.

— **cal'cu-lat"ing-ma-chine",** *n.* **1.** A machine for performing arithmetical operations, as a tide-predicting machine, an instrument for integrating differential equations, a machine for calculating eclipses, or a differential engine. See illus. under COMPTOGRAPH. **2.** One of various devices to aid computation, as the abacus, Napier's rods, planimeters, the celestial globe, etc.

— **cal'cu-lat"ing-ly,** *adv.*

cal"cu-la'tion, 1 kal'kiu-lē'shən; 2 călˈcū-lāˈshon, *n.* **1.** The act, art, manner, or practise of calculating, reckoning, or computing; as, *calculation* has to do with numbers.

Whenever we term arithmetic the science of *'calculation,'* we . . . allude to that rudimental period of the science of numbers, when pebbles (calculi) were used . . . to facilitate the practice of counting. TRENCH *On the Study of Words* lect. iv, p. 123. [W. J. W.]

2. An arithmetical computation and its result; as, the first *calculation* was erroneous. **3.** An estimate of probability; a forecast; as, my *calculations* failed.

The fate of the Triennial Bill confounded all the *calculations* of the best informed politicians of that time.
MACAULAY *England* vol. iv, ch. 20, p. 382. [P. S. & CO. 1856.]

4. A planning, scheming, or politic habit of mind; as, a man of cool *calculation.*

Whether death or slavery should be inflicted on the conquered enemy was, in fact, not a question of morality or mercy, but a question of *calculation.* J. R. SEELEY *Ecce Homo* p. 149. [L. BROS. 1871.]

[F., < L. *calculatio(n-),* < *calculatus,* pp.; see CALCULATE.]— **cal"cu-la'tion-al,** *a.* Pertaining to or used in calculation.

cal'cu-la-tive, } 1 kal'kiu-lə-tiv; 2 călˈcū-la-tīv, *a.* Of
cal'cu-la-tivª, } or pertaining to calculation; given to calculation.

England, the most *calculative,* is the least meditative, of all civilised countries.
CARLYLE *Essays, Characteristics* in vol. iii, p. 39. [H. M. & CO.]

cal'cu-la"tor, 1 kal'kiu-lē"tər *or* -tor; 2 călˈcū-lā"tər, *n.* **1.** One who computes or reckons. **2.** One who schemes or forecasts. **3.** *Math.* (1) A calculating-machine. (2) A set of tables for ready reckoning.— **bar calculator,** a calculating-machine actuated by movable bars, used for addition and subtraction.— **single-axle c.,** a calculating-apparatus in which the slide-rules turn on a single axle.

cal'cu-la-to-ry, 1 kal'kiu-lə-to-rı; 2 călˈcū-la-to-ry, *a.* Of or pertaining to calculation.

cal'cu-li, 1 kal'kiu-lai; 2 călˈcū-lī, *n.* Plural of CALCULUS.

cal'cu-li-form, 1 kal'kiu-li-fōrm; 2 călˈcū-li-fôrm, *a.* Shaped like a pebble. [< CALCULUS + FORM.]

cal'cu-li-frage, 1 kal'kiu-li-frēj; 2 călˈcū-li-frăj, *n.* An instrument for reducing calculus, or stone in the bladder, by crushing it; a lithotrite. [< CALCULUS + L. *frango,* break.]— **cal"cu-lif'ra-gous,** *a.* Efficacious in reducing calculus; lithotritic.

cal'cu-list, 1 kal'kiu-list; 2 călˈcū-lĭst, *n.* One who calculates; a mathematician.

cal'cu-lous, 1 kal'kiu-lus; 2 călˈcū-lŭs, *a.* **1.** Hard like stone; stony; gritty; as, a *calculous* deposit. **2.** *Med.* Resembling, pertaining to, or affected with calculus.

[< L. *calculosus*, < *calculus*, pebble; see CALCULUS.]

cal'cu-lose†.

cal'cu-lus, 1 kal'kiu-lus; 2 căl'cū-lŭs, *n.* [-LI, 1 -lai; 2 -lī, *pl.*] **1.** *Pathol.* A concretion formed in various parts of the body, as the kidneys, gall-bladder, joints, etc., resembling a pebble in hardness. A **biliary calculus** is one connected with the biliary passages; a **hepatic c.** is one found in the liver; a **cystic c.** is one found in the gall-bladder. For others see below.

2. *Math.* Any method of calculating or investigating by algebraic symbols.

While *calculus* is sometimes used in this wide sense, it is commonly used, when without a qualifying word, for the *infinitesimal calculus*, and includes *differential calculus* and *integral calculus*. See phrases below.

3. *Logic.* Inference from propositions or hypotheses indicated and treated algebraically. **4.** [Rare or Obs.] A reckoning; calculation. [L., dim. of *calx* (*calc-*), stone.] — **alternating calculus**, a calculus formed in one of the urinary organs, consisting of successive layers of different chemical composition.— **alvine calculi**, concretions due to the thickening and drying of portions of feces in the intestine.— **arthritic c.**, a pebbly concretion in the capsules of the joints, as in gout and like diseases.— **baricentric c.** (*Math.*), a geometrical method in which weight as well as position is assigned to a point.— **c. of enlargement** (*Math.*), a method of ascertaining algebraic developments or the like, in the calculus of finite differences, by the use of various symbols of operation, as E, Δ, and Σ.— **c. of extension**, a calculus for space-analysis, invented by Grassmann. **directional c.**‡.— **c. of finite differences**, the branch of analysis that treats of the ratios of finite corresponding increments of mutually dependent quantities.— **c. of fluxions**, or **fluxionary c.**, a form of the infinitesimal calculus used by Sir Isaac Newton, based on the conception of fluxions.— **c. of forms**, the theory of invariants or the like presented symbolically after the method of Jordan.— **c. of functions**, a method of finding functions that shall fulfil given conditions.— **c. of imaginaries**, algebra of two dimensions in which the so-called imaginary unit $\sqrt{-1}$ is used.— **c. of limits**, a method of proof by testing the convergence of a series satisfying a differential equation by comparison with another series known to be convergent and formed similarly from another differential equation.— **c. of operations**, that branch of analysis which treats of the laws governing the combinations of symbols of operation.— **c. of probabilities**, the mathematical method founded on the theory of probabilities.— **c. of variations**, that branch of analysis which inquires what form a function must take in order that some quantity depending upon it may be a maximum or minimum.— **coral c.**, a calculus having a branched form caused by its being a cast of the pelvis and calices of the kidney.— **differential c.**, that branch of analysis which investigates the infinitesimal changes of quantities when the relations between the quantities are given.— **exponential c. 1.** The discussion and interpretation of exponents as a branch of algebra. **2.** The division of infinitesimal calculus in which the exponential functions are treated.— **hedonic c. 1.** A proposed method of applying mathematics to the deduction of particular consequences from certain assumed principles of ethics or economics. **2.** A calculus in which a certain hypothetical quantity of eudemonistic good is made the unit of measurement. **c. of pleasure**‡.— **hemp-seed c.**, a small smooth calculus of calcium oxalate in or near the kidneys.— **infinitesimal c.**, the principles of reasoning by the use of symbols representing the infinitesimal increments or variations of quantities, comprehending the differential and integral calculus.— **integral c.**, that branch of analysis which, from the relations among the infinitesimal changes or variations of quantities, deduces relations among the quantities themselves.— **intestinal c.** (*Vet.*), a dust-ball.— **nephritic** or **renal c.**, a concretion formed in the kidney.— **sect c.**, a calculus dealing with sects, or portions, of straight lines.— **urinary c.**, a concretion formed in the urinary passages: the stone.

cal-cu'me-ter, 1 kal-kiū'mi-tər; 2 cal-cū'me-ter, *n.* A form of adding-machine.

Cal-cut'ta, 1 kal-kut'ə; 2 căl-cūt'a, *n.* A commercial and manufacturing city, on the Hugli river; capital of Bengal; captured from the British by Surajah Dowlah, 1756; prisoners kept in the "Black Hole"; recaptured by Clive after 7 months. Capital of India till 1911.

cald, *pp.* Called. S. S.

Cal-da'ra, 1 kal-dā'ra; 2 căl-dā'ră, **Polidoro** (1492–1543). An Italian painter; sometimes called **Caravaggio**, from his birthplace; murdered at Messina by his servant.

cal-da'ri-um, 1 kal-dē'ri-um; 2 căl-dā'ri-ŭm, *n.* [-RI-A, *pl.*] [L.] *Rom. Antiq.* A room for the hot bath in a bathing-establishment.

Cal'das, 1 kūl'das; 2 căl'dăs, *n.* A department of Colombia; 7,380 sq. m.; capital, Manizales.

Cal'dees, *n. pl. Bib.* Same as CHALDEES.

Cal'der, 1 kōl'dər; 2 cal'der, **Sir Robert** (?/₁1745–⁹/₁₁1818). A British admiral; fought indecisive action against French and Spanish fleet, July 22, 1805, which frustrated Napoleon's intended invasion of England.

cal-de'ra, 1 kal-di'ra; 2 căl-dē'ra, *n.* [Sp.] **1.** *Geol.* A large, roughly circular depression, in many cases with a partially broken-down rim, formed by the explosive disruption of a volcanic cone, or by the collapse of a crater-floor. **2.** A large caldron. **chal-de'ra**‡.

Cal"de-ra'ri, 1 kāl'dē-rā'ri; 2 căl"dę-rā'ri, *n. pl.* A Neapolitan secret society formed to oppose the revolutionary Carbonari, before the restoration of the Bourbons in 1815. [It., pl. of *calderaro*, coppersmith, < *caldara*, < L. *caldaria*; see CALDRON.]

Cal"de-ra'ro, 1 -ro; 2 -ro, *n.* [It.] A member of the Calderari. See CALDERARI and CARBONARO.

cal"de-rīl'la, 1 kāl'dē-rīl'ya; 2 căl'dę-rīl'yă, *n.* [Sp.] The cuarto: also applied to any Spanish copper coin current among Spanish peoples.

cal'der-ite, 1 kal'dər-ait; 2 căl'der-it, *n.* *Mineral.* A variety of garnet.

Cal'de-ron de la Bar'ca, 1 kal'də-rən *or* (*Sp.*) kūl'dē-rōn' dē la bär'ka; 2 căl'dę-ron *or* (*Sp.*) căl'dę-rōn' dę lä bär'că, **Pedro** (¹/₁₁1600–⁵/₂₁1681). A Spanish dramatist.

cal-dese'†, *vt.* To cheat: more correctly, *chaldese*.

Cal'dew-gate, 1 kūl'diu-gēt; 2 cal'dū-gāt, *n.* A suburb of Carlisle, Cumberland, England.

cald'rife, *a.* Cauldrife. See CAULD¹.

cal'dron, 1 kōl'drən; 2 cal'dron, *tt.* [Rare.] To place or enclose in a caldron.

cal'dron, *n.* **1.** A large kettle or boiler. **2.** Any object shaped like a caldron or represented as similar to a caldron of boiling liquid. [ME. *caudron*, < Old Norman F. *caudron*, = OF. *chaudron*, aug. of *caudiere*, < L. *cal-daria*, < *caldus*, hot, < *calco*, be hot.] **caul'dront**.— **cal'dron-bot"tom**, *n.* A cast of a vertical, Sigillarioid, tree-trunk above or below a coal-bed. Same as KETTLE-BOTTOM.

Cald'well, 1 kōld'wel; 2 cald'wĕl, *n.* **1.** A county in Kentucky; 338 sq. m.; county-seat, Princeton. **2.** A parish in Louisiana; 557 sq. m.; parish-seat, Columbia. **3.** A county in Missouri; 426 sq. m.; county-seat, Kingston. **4.** A county in North Carolina; 507 sq. m.; county-seat, Lenoir. **5.** A county in Texas; 530 sq. m.; county-seat, Lockhart. **6.** A city in Summer county, Kan. **7.** A town, county-seat of Burleson county, Tex. **8.** A village, county-seat of Noble county, O. **9.** A borough in Essex county, N.J.

cale, 1 kēl; 2 căl, *v.* [Prov. Eng.] **I.** *t.* To throw. **II.** *i.* To caper.

cale, *n.* [North. Eng.] A turn; as, one's *cale* to watch.

ca'le-an, 1 kə'li-an; 2 că'le-an, *n.* The Persian water-pipe or narghile: hubble-bubble. **cal'e-ron**‡; **cal'le-an**‡; **cal'le-on**‡; **ka'le-an**‡.

Ca'leb, 1 kē'leb; 2 că'lĕb, *n.* A masculine personal name. *Bib. 1 Chron.* ii, 9.

Ca"leb-eph'ra-tah, 1 -ef'rə-tə; 2 -ĕf'ra-ta, *n.* *Bib. 1 Chron.* ii, 24.

cale-can'non, 1 kēl-kan'ən; 2 căl-căn'on, *n.* A stew composed principally of potatoes and greens: an Irish dish. [< COLE¹; orig. of *cannon* unknown.] **col-can'non**‡; **cole-can'non**‡.— **calecannon night** [St. Johns, Newfoundland], Hallowe'en: so called because *calecannon* is then eaten.

ca"lèche', 1 ka'lēsh'; 2 că'lāch', *n.* [F.] A calash.

Cal"e-do'ni-a, 1 kal'i-dō'ni-ə; 2 căl'e-dō'ni-a, *n.* **1.** Ancient and poetical name of Scotland. **2.** A county in Vermont; 652 sq. m.; county-seat, St. Johnsbury. **3.** A village in Livingston county, N. Y. **4.** A village in Houston county, Minn.

— **Abyssinian Calendar** begins with the 1st of Maskarram, which corresponds to about September 10: the year consists of 365 days (366 in leap-year) divided into 12 months of 30 days, **Maskarram, Tekmet, Hadaz, Tahsas, Tarr, Yekatit, Magawit, Miazlat, Genbot, Sanni, Hamle, Nashi**, with 5 days known as Pagmen or Quagimi, and kept as holidays. In style this calendar is 7 years and 8 months behind the Gregorian, and Easter falls a week later.— **Calendar Amendment Act**, an English statute providing for the adoption of the Gregorian amendment of the Julian calendar, passed in 1751, and going into effect Sept. 3, 1752, which day was by its provisions reckoned as the 14th, to cancel the 11 days' difference between the old and new styles. It further transferred the beginning of the New Year from March 25 to Jan. 1, beginning in 1753. **Lord Chesterfield's Act**‡.— **c. clock**, a clock which, in addition to the ordinary time-recording functions, notes the days of the week, month, or year, the movements of the heavenly bodies, etc.— **c. month** or **year**, a month or year as defined in a calendar, especially the Gregorian calendar: distinguished from a lunar month; also, a period equivalent to a month, as from Jan. 15 to Feb. 15.— **cal'en-dar-stone"**, *n.* A stone bearing carved figures formerly considered of calendric value; specifically, a circular Aztec monolith, weighing almost 50 tons, unearthed in Mexico in 1790 and moved to the Museum in Mexico City in 1895. Its carvings, formerly taken to represent the Aztec calendar, are now believed to *indicate that the stone was a votive offering*.— **Chinese c.**, the calendar used by the people of China, having a year composed of twelve months, each having about 29 or 30 days, an intercalary month being added every thirty years. The New Year falls between Jan. 21 and Feb. 19, or on the first moon after the sun enters Aquarius.— **Greek c.**, any one of the calendars used by the Greeks. In ancient times these varied in the different states, as to length, names, and positions in the year, of the several months; and there is much uncertainty about some of the systems followed. But the year was generally based on lunar motions, and alterations were made from time to time to adjust the lunar and solar year. The following is a list of the Attic months, with the number of days in each and approximation to the months of our present system:

The Julian calendar is the one in use in modern Greece. — **Gregorian c.**, the calendar prescribed by Pope Gregory XIII., by which the Julian calendar was modified by calling Oct. 5, 1582, Oct. 15, and continuing the count ten days in advance, and by making the terminal years of the centuries, 1700, 1800, 1900, etc., common years of 365 days, except when the year was a multiple of 400, as 1600, 2000, etc.: the calendar now in use in nearly all Christian countries except Russia and Greece. **new style**‡. — **Hebrew c.** The present calendar of the Jews: derived from the Babylonians and in use substantially in its present form since the Babylonian captivity. The present names of the months are all of Babylonian origin. A few of the months have older Hebrew names, given in the Bible, but in the main the months were given simply by number. The Hebrew calendar reckons the date of creation 3,760 years and 3 months before the birth of Christ. The Hebrew month is a lunar month, but the years are corrected to solar time. Its principal periods are the *cycle*, of 19 years; the *year*, either ordinary or embolismic, containing 12 and 13 lunar months respectively, or 353–355 and 383–385 days; the *month*, of 29 or 30 days; and the *intercalary month*, occurring only in the embolismic years, and containing 30 days intercalated. Of these 30 days, 29 belong to Ve-Adar; and the month Adar, which in ordinary years has 29 days, in embolismic years has 30 days. Each cycle contains 7 embolismic years. The adjustment of the months as above indicated precludes the comparison of the Hebrew months with those of the Gregorian calendar except by approximation based on an average. The following gives the results of such an average, with the length of the respective months in days:

— **Hindu c.**, the calendar in use in India. The Vedic races from whom the Hindus sprang divided the year into six seasons, **Vasanta**, or Spring, the "flowery"; **Grishna**, the "hot"; **Varsha**, the "rainy"; **Sarada**, the "sultry"; **Hemanta**, the "frosty"; and **Sisira**, the "dewy." In process of time

these seasons were subdivided in honor of the Solar and Lunar Dynasties who were believed to have held sway in India, and these lunisolar divisions were named after or held sacred to these legendary heroes or divinities. The months of the year, beginning with **Balsakh,** which corresponds to the latter part of April and the opening week of May, are **Jeth, Asarh, Sravana, Bhadra, Kuar, Kartika, Aghan, Pus, Magh, Phagun or Phalguna,** and **Chaitra.** The intercalary month takes the name of the month after which it is inserted. Phagun or Phalguna is a month of rejoicing, and from **Phag,** its eighth day, to **Poonini,** its last day, the festivities resemble the *Saturnalia* of ancient Rome. Bhadra is the month of the birth of Krishna, to whom the months of Sravana and Kartika are sacred.— **hundred-year c.,** a form of almanac giving the calendar and predictions of the weather for a hundred years: formerly common in Germany.— **Julian c.,** the calendar prescribed by Julius Cæsar, in which three years of 365 days each were always followed by one of 366 days, and the months, after some changes made by Augustus as to their number of days, had the length now adopted in Europe and America. This calendar is now 13 days behind the Gregorian calendar. **old style†.**— **Mexican c.,** a pre-Columbian calendar used by the inhabitants of Mexico and Yucatan, combining an astrological and a solar calendar, the first consisting of 13 and the second of 18 periods of 20 days each, or 260 and 360 days respectively. To the latter were added 5 days, making a year of 365. Each of the 360 days was dedicated to a deity; the last 5 were not, and were consequently deemed unlucky. The days of the astrological calendar bore the names of objects.— **Mohammedan c.,** the calendar generally used in almost all Mohammedan countries, reckoning time from July 16, A. D. 622, the day following Mohammed's flight from Mekka to Medina (the Hegira). The year consists of 12 lunar months of a mean duration of 29 days, 12 hours, 44 minutes. A cycle consists of 30 years, of which 19 are ordinary years of 354 days each, and 11 are embolismic, with 355 days. The following list gives the names and durations of the months:

The New *Newgate Calendar,* or Malefactors' Bloody Register, containing Authentic and Circumstantial Accounts of the Lives, Transactions, Exploits, Trials, Executions, Dying Speeches, Confessions. And other Curious Particulars, Relating to all the most notorious Criminals . . . and Violators of the Laws of their Country, who have suffered Death and other Exemplary Punishments, in England, Scotland, and Ireland, from the Commencement of the Year 1700 to the Present Time. *Newgate Calendar* title-page.

— **perpetual c.,** a calendar by which may be ascertained the day of the week in any given year during a widely extended period of time.

PERPETUAL CALENDAR.

To find the day of the week for any given date:

(1) Take the last two figures of the year, add ¼ of them, neglecting remainder. (2) Add for the month, if for Jan. or Oct., 1; May, 2; Aug., 3; Feb., Mar., or Nov., 4; June, 5; Sept. or Dec., 6; April or July, 0; if leap-year (that is, if it be divisible by 4 without remainder) Jan., 0; Feb., 3. (3) Add day of month. Divide the sum of these three by 7, and remainder gives the number of the day of the week. Thus:

What day of the week was August 28, 1911?

(1) 11+2 =13
(2) August= 3
(3) Date =28

44=7×6 + 2 or second day of the week=Monday.

The foregoing applies only to the 20th century. For 19th century, add 2; for 21st century, add 6; 18th century, 4; but before 1752 the "old style" was used.

— **Republican or Revolutionary c.** (*F. Hist.*), the calendar instituted on Oct. 5, 1793, by the first French republic, and abolished Dec. 31, 1805. Its scheme divided the year into 12 months of 30 days each, with five (or six) supplementary days (*Sansculottides*) at the end of the last month. The months were divided into 3 decades, every tenth day being a day of rest, Sundays being ignored. Provision was made for leap-years by adding a sixth day to the supplementary days whenever necessary to make the year terminate at the equinox, which was generally every fourth year. Each four-year period was termed a *franciade.* The calendar was retrospective in action, and its first year (Year I.) began Sept. 22, 1792. The months and their corresponding periods in the Gregorian calendar are as follows:

Vendémiaire, Sept. 22 to Oct. 21.	Floréal, April 20 to May 19.
Brumaire, Oct. 22 to Nov 20.	Prairial, May 20 to June 18.
Frimaire, Nov. 21 to Dec. 20.	Messidor, June 19 to July 18.
Nivose, Dec. 21 to Jan. 19.	Thermidor (or Fervidor),
Pluviose, Jan. 20 to Feb. 18.	July 19 to Aug. 17.
Ventose, Feb. 19 to Mar. 20.	Fructidor, Aug. 18 to Sept. 16.
Germinal, Mar. 21 to April 19.	Sansculottides, Sept. 17 to Sept. 21.

— **Roman c.,** the earliest Roman calendar, attributed to Romulus, is supposed to have been based upon a year of 10 months, or 304 days, viz.:

Month.	No. of Days.	Month.	No. of Days.	Month.	No. of Days.
Mar'tius...	31	Quin-ti'lis....	31	No-vem'ber..	30
A-pri'lis....	30	Sex-ti'lis....	30	De-cem'ber..	30
Ma'ius.....	31	Sep-tem'ber..	30		
Ju'nius.....	30	Oc-to'ber....	31		304

Like all lunar calendars, this had to be adjusted by intercalation to correct the difference between the lunar and solar years. Numa intercalated a month called Mercedinus; this consisted of 22 or 23 days alternately, and was inserted every second year. Other changes were made by decemviral legislation. Numa also added two months — February and January — which were inserted between December and March, but in 452 B. C. the Decemvirs changed their positions, and placed these months in the order they now occupy. In 46 B. C. Julius Cæsar ordained the Julian calendar, by which time was measured by most civilized nations till the accumulation of error necessitated the establishment of the Gregorian calendar.— **Russian c.,** the Julian calendar.
